## **NRC Makes Available Perry Nuclear Plant License Renewal Application**

The Nuclear Regulatory Commission has received an application from Energy Harbor Nuclear Corp. to renew the operating license for the Perry Nuclear Power Plant in Perry, Ohio. The [application](#) is now available on the NRC website.

Energy Harbor filed the application on July 3, seeking to renew the license for an additional 20 years of operation. Perry's boiling-water reactor, located about 35 miles northeast of Cleveland, is currently licensed to operate through Nov. 7, 2026.

The NRC staff is reviewing the application to determine if it is sufficiently complete to begin the agency's detailed safety and environmental reviews. If the application is determined to be complete, the staff will docket it and publish a notice of opportunity to request an adjudicatory hearing before the NRC's Atomic Safety and Licensing Board.

Information about the license renewal process is available on the [NRC website](#). A copy of the Perry license renewal application also will be available at the Perry Public Library, 3753 Main Street in Perry; and at the Madison Public Library, 6111 Middle Ridge Road in Madison, Ohio.
