## **NRC TO MEET WITH SONGS OFFICIALS TO DISCUSS RESULTS OF SPECIAL INSPECTION**

The U.S. Nuclear Regulatory Commission staff will meet with officials of the San Onofre Nuclear Generating Station on March 21 to discuss the results of a special NRC inspection that reviewed circumstances surrounding the February 3 electrical fire that caused SONGS Unit 3 to be shutdown.

The meeting will be held in the Learning Center, Building E-50, at the SONGS site beginning at 10 a.m. The public is invited to observe the meeting. NRC officials will be available to answer questions afterward.

The four-person special inspection team was sent to SONGS on February 6 following the electrical fire and subsequent plant shutdown. The NRC routinely sends its inspectors to a nuclear plant that experiences an unusual equipment failure so it may fully understand the event. The team's written report will be available within 30 days.
