## **NRC TO MEET WITH EXELON GENERATION CO. TO DISCUSS SAFETY PERFORMANCE AT THE DRESDEN NUCLEAR PLANT**

The Nuclear Regulatory Commission will meet with Exelon Generation Company officials July 11 to discuss the NRC's annual assessment of safety performance at the Dresden Nuclear Station near Morris, Illinois.

The meeting will begin at 1:30 p.m. CDT and will be held at the plant's Training Center in rooms 101-103, 6500 N. Dresden Road near Morris. The public is invited to observe the session. NRC officials will be available afterwards to answer questions.

The annual assessment, referred to as the End-of-Cycle assessment, evaluates safety performance at the Dresden plant from April 2000 through March 2001, and informs plant officials of the NRC's plans for future inspections at the facility.

The Dresden assessment letter and inspection report are available at <http://www.nrc.gov/OPA/ppr> or from the Region III Public Affairs Office. Current performance information for the plant is available at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.
