SUBJECT: SUMMARY OF THE MEETING WITH SHAW AREVA MOX SERVICES
ON THE 2007 UPDATE OF THE LICENSE APPLICATION AND
INTEGRATED SAFETY ANALYSES SUMMARY FOR THE MIXED
OXIDE FUEL FABRICATION FACILITY TO BE BUILT NEAR
AIKEN, SC

On December 19, 2007, U.S. Nuclear Regulatory Commission staff met with representatives from Shaw AREVA MOX Services to discuss the 2007 update of the license application to possess and use special nuclear material and the Integrated Safety Analyses Summary for the Mixed Oxide Fuel Fabrication Facility.

Please see the enclosed meeting summary for more details (Enclosure 1). The meeting attendance list is also enclosed (Enclosure 2). The meeting handout can be found in Enclosure 3. The enclosures do not contain any official use only information.

SUMMARY OF THE MEETING WITH SHAW AREVA MOX SERVICES ON
THE 2007 UPDATE OF THE LICENSE APPLICATION AND
INTEGRATED SAFETY ANALYSES SUMMARY
FOR THE MIXED OXIDE FUEL FABRICATION FACILITY

Date: December 19, 2007

Place: U.S. Nuclear Regulatory Commission (NRC) Headquarters, Rockville, MD

Attendees: See Enclosure 2

Purpose:

This purpose of the meeting was for Shaw AREVA MOX Services (MOX Services) to present to NRC and interested members of the public the changes that were made in the 2007 update of the license application (LA) to possess and use special nuclear material and the Integrated Safety Analyses Summary (ISAS) for the Mixed Oxide Fuel Fabrication Facility (MFFF).

Discussion:

The applicant discussed its strategy for updating the LA and the ISAS in 2007. MOX Services also provided a summary of the changes that were made to both documents and discussed a look ahead to revisions in 2008.

The revised LA was submitted in both its "official use only" and "redacted" versions. The changes can be summarized as follows:

- a. Changes due to the engineering change request process (based on the MOX Services document PP8-6, Licensing Basis Configuration Management).
- b. Changes due to code updates, minor editorial changes, and corporate name change.
- c. Revisions to chemical interaction tables and the process chemical hazardous characteristics and incompatibilities table in Chapter 8.
- d. Chapter 11, Plant Systems, was revised to be consistent with the ISAS.
- e. Chapter 12, Human Factors, was substantially rewritten to provide additional details and to discuss the human factors implementation plan.

The ISA Summary (Official Use Only) was revised as follows:

- a. Changes due to the engineering change request process (based on the MOX Services document PP8-6, Licensing Basis Configuration Management).
- b. Changes due to code updates, minor editorial changes, and corporate name change.
- c. Changes due to revisions to the Nuclear Safety Evaluations and the Nuclear Criticality Safety Evaluations.

In the look ahead for 2008, the applicant stated that revisions will be based on responses to NRC requests for additional information, codes and standards clarifications, items relied upon for safety boundaries, removal of duplication between the LA and ISAS, and PP8-6 related changes.

No regulatory decisions were made at the meeting.

The meeting was then adjourned.
