NRC NAMES NEW RESIDENT INSPECTOR AT SAN ONOFRE NUCLEAR GENERATING STATION

The U.S. Nuclear Regulatory Commission has assigned John Reynoso as resident inspector at the San Onofre Nuclear Generating Station. The plant, located in San Clemente, Ca., is operated by Southern California Edison Co.

“John Reynoso’s technical and regulatory experience will assist the NRC in carrying out its mission of protecting people and the environment and ensuring the safe operation of nuclear power plants,” said NRC Region IV Administrator Elmo E. Collins.

Reynoso served in the U.S. Navy’s nuclear fleet and worked at two commercial nuclear plants before joining the NRC in 2005. He has a M.B.A. degree in information technology and a B.S. degree in engineering from the University of Arizona.

Each of the country's commercial nuclear plants has resident inspectors who serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and interacting with plant workers and the public.

The resident inspectors at SONGS can be reached at: (949) 492-2641.
