NRC ANNOUNCES OPPORTUNITY TO PARTICIPATE IN HEARING ON NEW REACTOR APPLICATION FOR CALLAWAY SITE

The Nuclear Regulatory Commission today announced the opportunity to participate in a hearing on a Combined License (COL) application for a new nuclear reactor at the Callaway site near Fulton, Mo.

AmerenUE submitted the COL application and associated information July 24, 2008, and updated the application on Sept. 24, 2008, and Nov. 14, 2008. AmerenUE seeks approval to build and operate an Evolutionary Power Reactor (EPR) at the site, approximately 10 miles southeast of Fulton. The NRC is currently reviewing the EPR for possible certification. The Callaway application, minus proprietary or security-related details, is available on the NRC Web site at: <http://www.nrc.gov/reactors/new-reactors/col/callaway.html>.

The NRC staff has determined that the application contains sufficient information for the agency to formally “docket,” or file, the application and begin its technical review. Docketing the application does not preclude additional requests for information as the review proceeds; nor does it indicate whether the Commission will issue the license. The docket number established for this application is 52-037.

The NRC has issued in the *Federal Register* a notice of opportunity to intervene in the proceeding on the application, and the deadline for requesting a hearing is April 6. Petitions may be filed by anyone whose interest may be affected by the proposed license, who wishes to participate as a party in the proceeding, and who meets criteria set out in the NRC’s regulations. Background information regarding the hearing process was provided by NRC staff to members of the public during a July 2008 public information session in Fulton.

A petition to intervene must be electronically submitted in a timely manner to the NRC’s Electronic Information Exchange (EIE) system. The petition to intervene must be filed in accordance with the NRC’s E-Filing Rule, published in the *Federal Register* on Aug. 28, 2007. Additional guidance and instructions regarding electronic submissions to the NRC EIE system is available on the NRC web pages at <http://www.nrc.gov/site-help/e-submittals.html>.

Detailed information about the new reactor licensing process can be found on the NRC Web site at: <http://www.nrc.gov/reactors/new-reactor-licensing.html>.
