NRC Regulatory Agenda

**Semiannual Report
July – December 2009**

AVAILABILITY OF REFERENCE MATERIALS IN NRC PUBLICATIONS

NRC Reference Material

As of November 1999, you may electronically access NUREG-series publications and other NRC records at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm.html>.

Publicly released records include, to name a few, NUREG-series publications; *Federal Register* notices; applicant, licensee, and vendor documents and correspondence; NRC correspondence and internal memoranda; bulletins and information notices; inspection and investigative reports; licensee event reports; and Commission papers and their attachments.

NRC publications in the NUREG series, NRC regulations, and *Title 10, Energy*, in the Code of *Federal Regulations* may also be purchased from one of these two sources.

1. The Superintendent of Documents
U.S. Government Printing Office
Mail Stop SSOP
Washington, DC 20402-0001
Internet: bookstore.gpo.gov
Telephone: 202-512-1800
Fax: 202-512-2250
2. The National Technical Information Service
Springfield, VA 22161-0002
www.ntis.gov
1-800-553-6847 or, locally, 703-605-6000

A single copy of each NRC draft report for comment is available free, to the extent of supply, upon written request as follows:

Address: U.S. Nuclear Regulatory Commission
Office of Administration
Reproduction and Mail Services Branch
Washington, DC 20555-0001

E-mail: DISTRIBUTION@nrc.gov

Facsimile: 301-415-2289

Some publications in the NUREG series that are posted at NRC's Web site address <http://www.nrc.gov/reading-rm/doc-collections/nuregs> are updated periodically and may differ from the last printed version. Although references to material found on a Web site bear the date the material was accessed, the material available on the date cited may subsequently be removed from the site.

Non-NRC Reference Material

Documents available from public and special technical libraries include all open literature items, such as books, journal articles, and transactions, *Federal Register* notices, Federal and State legislation, and congressional reports. Such documents as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings may be purchased from their sponsoring organization.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at—

The NRC Technical Library
Two White Flint North
11545 Rockville Pike
Rockville, MD 20852-2738

These standards are available in the library for reference use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from—

American National Standards Institute
11 West 42nd Street
New York, NY 10036-8002
www.ansi.org
212-642-4900

Legally binding regulatory requirements are stated only in laws; NRC regulations; licenses, including technical specifications; or orders, not in NUREG-series publications. The views expressed in contractor-prepared publications in this series are not necessarily those of the NRC.

The NUREG series comprises (1) technical and administrative reports and books prepared by the staff (NUREG-XXXX) or agency contractors (NUREG/CR-XXXX), (2) proceedings of conferences (NUREG/CP-XXXX), (3) reports resulting from international agreements (NUREG/IA-XXXX), (4) brochures (NUREG/BR-XXXX), and (5) compilations of legal decisions and orders of the Commission and Atomic and Safety Licensing Boards and of Directors' decisions under Section 2.206 of NRC's regulations (NUREG-0750).

NRC Regulatory Agenda

Semiannual Report July – December 2009

Manuscript Completed: March 2010
Date Published: March 2010

Office of Administration

Preface

The Nuclear Regulatory Commission (NRC) Regulatory Agenda is a semiannual compilation of the agency's recent rulemaking activities. It contains a summary and the status for each ongoing rulemaking and petition for rulemaking received by the agency.

Organization of the Agenda

The agenda consists of two sections that have been updated through December 31, 2009. Section I, "Rules," includes: (A) rules on which final action has been taken since June 30, 2009, the closing date of the last NRC Regulatory Agenda; (B) rules published previously as proposed rules on which the Commission has not taken final action; (C) rules published as advance notices of proposed rulemaking for which neither a proposed nor final rule has been issued; and (D) unpublished rules on which the NRC expects to take action.

Section II, "Petitions for Rulemaking," includes: (A) final actions on petitions for rulemaking since June 30, 2009; and (B) petitions pending staff review.

In Section I of the agenda, the rules are aligned numerically with the parts of Title 10, Chapter I, of the Code of Federal Regulations (CFR) (Title 10). If more than one rule appears under the same part, the rules are arranged within that part by date of most recent publication. If a rule amends multiple parts, the rule is listed under the lowest numbered affected part.

In Section II of the agenda, the petitions are aligned numerically with the parts of Title 10 and are identified with a petition for rulemaking (PRM) number. If more than one petition appears under the same CFR part, the petitions are arranged by PRM numbers in consecutive order within that part of Title 10.

Organization of Agenda Entries

Each rulemaking agenda entry has a Regulation Identifier Number (RIN) and a Docket ID. The RIN number allows the public to track the publication history of a regulatory action in the Unified Agenda of Federal Regulatory and Deregulatory Actions, compiled by the Office of Management and Budget's Office of Information and Regulatory Affairs. The Unified Agenda, published every spring and fall, provides uniform reporting of data on regulatory and deregulatory activities under development throughout the Federal Government.

The Docket ID allows the public to access significant documents and public comments on the rulemaking activity at the website <http://www.Regulations.gov>, the public face of the Federal E-Government eRulemaking Program. This site facilitates public participation in the Federal regulatory process by improving the public's ability to find, view, and comment on Federal regulatory actions.

The dates listed under the heading "Timetable" for scheduled action by the Commission, the Executive Director for Operations (EDO), or the Chief Financial Officer (CFO) on particular rules or petitions are considered tentative and are not binding on the Commission or its staff. They are included for planning purposes only. This Regulatory Agenda is published to provide the public with early notice and an opportunity to participate in the rulemaking process. However, the NRC may consider or act on any rulemaking proceeding even if it is not included in this Regulatory Agenda. Conversely, the inclusion in this Regulatory Agenda of unpublished rules on which the NRC is considering action does not commit the NRC to publishing the rule for public comment in the Federal Register.

The agency examines rules in process and under consideration on an annual basis to determine the allocation of staff resources necessary to achieve NRC's regulatory priorities most effectively. Any unpublished rule whose termination is directed prior to publication of a notice of proposed rulemaking or an advance notice of proposed rulemaking, including those that were intended to address issues raised in a petition for rulemaking, will be noted in this edition of the agenda and deleted from subsequent editions. Any rule whose termination is directed subsequent to publication of a notice of proposed rulemaking or an advance notice of proposed rulemaking will be removed from the agenda after publication of a notice of withdrawal in the Federal Register. Rules and petitions for rulemaking that appear in the agenda for the first time are identified by an asterisk (*).

Public Participation in Rulemaking

Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Attention: Rulemakings and Adjudications Staff, Washington, DC 20555-0001. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

You may also provide comments via the Federal eRulemaking Portal (<http://www.regulations.gov>) by following instructions for submitting comments. For information on NRC Rulemaking dockets contact Ms. Carol Gallagher, 301-492-3668 (e-mail: Carol.Gallagher@nrc.gov). You may e-mail comments to: Rulemaking.Comments@nrc.gov. If you do not receive a reply e-mail confirming that we have received your comments, contact us directly at 301-415-1677.

Public comments received on any rule listed in the agenda are on the Federal eRulemaking Portal (<http://www.regulations.gov>). The agenda and any rulemaking comments are also available for public inspection and copying for a fee at the Nuclear Regulatory Commission's Public Document Room, One White Flint North, 11555 Rockville Pike, Public File Area O1-F21, Rockville, MD, between 7:45 a.m. and 4:15 p.m., Federal workdays.

Additional Rulemaking Information

For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Doris Mendiola, Rulemaking and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone 301-492-3665 (persons outside the Washington, DC, metropolitan area may call toll-free: 1-800-368-5642), or e-mail Doris.Mendiola@nrc.gov. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading "Agency Contact" for that rule.

Preface	iii
I. Rules	
(A) Final Rules	
1. Administrative Changes: Clarification of the Location of Guidance for Electronic Submission and Other Miscellaneous Corrections* (10 CFR Chapter 1)	1
2. Late Filed Contentions of ITAAC (Parts 2 and 52).....	1
3. Clarification of Attesters and Supervisors (Part 35)	2
4. Administrative Changes (Parts 55 and 76).....	2
5. Industry Codes and Standards; Amended Requirements (Part 70).....	2
6. List of Approved Spent Fuel Storage Casks: HI-STORM 100U, Revision 7 (Part 72)	3
7. List of Approved Spent Fuel Storage Casks: HI-STORM 100, Revision 6 (Part 72)	4
8. List of Approved Spent Fuel Storage Casks: Standardized NUHOMS, System, Revision 10 (Part 72)	4
9. List of Approved Spent Fuel Storage Casks: HI-STORM 100, Revision 7 (Part 72)	5
10. Criminal Penalties; Unauthorized Introduction of Weapons (Part 73)	6
(B) Proposed Rules	
11. Decommissioning Planning (Parts 20, 30, 40, 50, 70, and 72).....	7
12. Expansion of the National Source Tracking System (Parts 20 and 32).....	7
13. Limiting the Quantity of Byproduct Material in a Generally Licensed Device (Part 31)	8

CONTENTS

(B) Proposed Rules (con't)

14.	Medical Use of Byproduct Material- Amendments/Medical Event Definition (Part 35).....	9
15.	Transfers of Certain Source Materials by Specific Licensees (Part 40).....	9
16.	Alternate Fracture Toughness Requirements Against Pressurized Thermal Shock Event (Part 50)	10
17.	Incorporation by Reference of Revisions of Regulatory Guides (Part 50)	10
18.	Risk-Informed Changes to Loss-of-Coolant Accident Technical Requirements (Part 50).....	11
19.	Enhancements to Emergency Preparedness Regulations and Guidance (Parts 50 and 52).....	12
20.	Update Fuel Performance Considerations and Other Fuel Cycle Issues (Part 51).....	13
21.	Categorical Exclusions From Environmental Review (Part 51).....	14
22.	Environmental Effect of Renewing the Operating License of a Nuclear Power Plant (Part 51).....	14
23.	Consideration of Environmental Impacts of Temporary Storage of Spent Fuel After Cessation of Reactor Operation and Waste Confidence Decision Update (Part 51).....	15
24.	Security Requirements for Geological Repository Operations Area (GROA) (Parts 60, 63, 73, and 74).....	15
25.	License and Certificate of Compliance Terms (Part 72)	16
26.	Export and Import of Nuclear Equipment and Materials; Updates and Clarifications (Part 110)	17

(C) Advance Notices of Proposed Rulemaking

27.	Entombment Options for Power Reactors (Parts 20 and 50).....	19
28.	Performance-Based Emergency Core Cooling System Acceptance Criteria (Part 50).....	19

CONTENTS

(C) Advance Notices of Proposed Rulemaking (con't)

29.	Approach to Risk-Inform, Performance-Based Requirements for Nuclear Power Plants (Parts 50 and 53)	20
30.	Advance Notification to Native American Tribes of Transportation of Certain Types of Nuclear Waste (Parts 71 and 73)	21
31.	Research and Test Reactor Fingerprinting Requirements for Unescorted Access (Part 73).....	21
32.	Variable Annual Fee Structure for Power Reactors (Part 171)	22

(D) Unpublished Rules

33.	Implementation of OMB Guidance on Nonprocurement Debarment and Suspension* (2 CFR Part 180)	23
34.	Revision to Petition for Rulemaking Process (Part 2)	23
35.	Amendments to Adjudicatory Process Rules and Related Requirements (Parts 2, 51, 54, 60, and 63)	23
36.	ITAAC Maintenance* (Parts 2 and 52)	24
37.	Controlling the Disposition of Solid Materials (Part 20)	24
38.	Material Control and Accounting of Special Nuclear Material (Parts 20, 40, 50, 63, 70, 74, 76, and 110).....	25
39.	Geological Repository Operations Area (GROA) Fitness-for-Duty Requirements (Part 26).....	25
40.	Fitness-For-Duty Programs (Part 26)	26
41.	Fitness-For-Duty (HHS Requirements) (Part 26)	26
42.	Requirements for Distribution of Byproduct Material (Parts 30, 31, 32, 40, and 70)	27
43.	Physical Protection of Byproduct Material (Parts 30, 32, 33, 34, 35, 37, 39, 51, 71, and 73).....	27
44.	Preceptor Attestation Requirements (Part 35).....	28

CONTENTS

(D) Unpublished Rules (con't)

45.	Distribution of Source Material to Exempt Persons and General Licensees and Revision of 10 CFR 40.22 General License (Part 40).....	28
46.	Uranium in Drinking Water (Part 40)	29
47.	Groundwater Protection <i>In Situ</i> Leach Uranium Recovery Facilities (Part 40)	30
48.	Integrated Safety Analysis for Uranium Conversion and Deconversion Facilities (Part 40)	30
49.	Administrative Changes (Parts 40 and 73).....	31
50.	Integrated Rulemaking for Decommissioning Nuclear Power Reactors (Part 50).....	31
51.	Modifications to Pressure-Temperature Limits and Reactor Vessel Material Surveillance Program Requirements (Part 50).....	32
52.	Decoupling of Assumed Loss of Offsite Power From Loss-of-Coolant Accident (LOCA) (Part 50).....	33
53.	Incorporation by Reference of 2005 Addenda Through 2008 Edition of ASME Code (Part 50)	34
54.	Emergency Response Date System (ERDS) Enhancement (Part 50)	34
55.	Incorporation by Reference of Revisions of ASME Regulatory Guides* (Part 50)	34
56.	Part 52 Supplemental Rule (Part 52).....	35
57.	Revise Part 71 for IAEA and DOT Compatibility (Part 71)	35
58.	List of Approved Spent Fuel Storage Casks: NUHOMS HD System, Revision 1* (Part 72).....	36
59.	ISFSI Security Requirements for Radiological Sabotage* (Parts 72 and 73)	37
60.	Enhanced Weapons, Firearms Background Checks, and Security Event Notification (Part 73)	37

CONTENTS

(D) Unpublished Rules (con't)

61.	Safeguarding Shipments of Spent Fuel (Part 73).....	38
62.	Access Authorization and Physical Protection Requirements For Nuclear Power Plant Construction (Part 73).....	38
63.	Sabotage of Nuclear Facilities, Fuel or Designated Material (Part 73).....	39
64.	Increase in the Primary Nuclear Liability Insurance Premium* (Part 140)	39
65.	Revision of Fee Schedules; Fee Recovery for FY 2010 (Parts 170 and 171)	40

II. Petitions for Rulemaking

(A) Final Actions on Petitions for Rulemaking

1.	State of Colorado and Organization of Agreement States (PRM-40-27).....	41
2.	Natural Resources Defense Council (PRM-50-90)	41
3.	State of Nevada (PRM-73-10)	42

(B) Pending Petitions for Rulemaking

4.	Professional Reactor Operator Society* (PRM-26-3).....	43
5.	Organization of Agreement States (PRM-31-05).....	43
6.	James Luehman (PRM-50-92)	44
7.	Nuclear Energy Institute (PRM-70-8).....	44
8.	C-10 Research and Education Foundation, Inc., (PM-72-6).....	44
9.	Nuclear Energy Institute* (PRM-73-14)	45

(A) Final Rules

I-RULES

A

1. Administrative Changes: Clarification of the Location of Guidance for Electronic Submission and Other Miscellaneous Corrections* (10 CFR Chapter 1)

RIN: 3150-AI73

Docket ID: NRC-2009-0397

Abstract: The final rule amends the Commission's regulations to clarify where persons may obtain detailed guidance for making electronic submissions to the NRC, as well as to make other miscellaneous corrections. This document is necessary to inform the public of these changes to the NRC's regulations.

Timetable:	Final Rule Published	12/01/09	74 FR 62676
	Final Rule Effective	12/31/09	

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Angella Love-Blair, Office of Administration,
(301) 492-3671, e-mail: Angella.Love-Blair@nrc.gov

2. Late Filed Contentions of ITAAC (Parts 2 and 52)

RIN: 3150-AI34

Docket ID: NRC-2009-0087

Abstract: The proposed rule would have amended the Commission's regulations to establish a limitation on the filing of late-filed contentions challenging whether acceptance criteria in ITAAC have been or will be met under Section 52.102. The proposed rule would have also established a separate hearing process for NRC consideration for such late-filed contentions. The proposed rule is no longer being developed, and this activity has been withdrawn by the NRC.

Final Action:	Proposed Rule Withdrawn	02/24/10
----------------------	-------------------------	----------

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Geary S. Mizuno, Office of the General Counsel,
(301) 415-1639; e-mail: Geary.Mizuno@nrc.gov

3. Clarification of Attesters and Supervisors (Part 35)

RIN: 3150-AI59

Docket ID: NRC-2009-0098

Abstract: The direct final rule amends the Commission's regulations to clarify that individuals grandfathered under Section 35.57 may also serve as attesters and supervisors for individuals seeking authorizations on NRC licensees.

Final Action:	Direct Final Rule Published	07/14/09	74 FR 33901
	Direct Final Rule Effective	09/28/09	
	Proposed Rule Published	07/14/09	74 FR 33925
	Comment Period Closed	08/13/09	
	Confirmation of Effective Date Published	08/27/09	74 FR 43619

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Edward M. Lohr, Office of Federal and State Materials and Environmental Management Programs,
(301) 415-0253; e-mail: Edward.Lohr@nrc.gov

4. Administrative Changes (Parts 55 and 76)

RIN: 3150-AI69

Docket ID: NRC-2009-0242

Abstract: The final rule amends the Commission's regulations to clarify the term "Under the Influence," and to correct an erroneous citation.

Final Action:	Final Rule Published	09/03/09	74 FR 45544
	Final Rule Effective	10/05/09	

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Lynn M. Hall, Office of Nuclear Reactor Regulation,
(301) 415-3759, e-mail: Lynn.Hall@nrc.gov

5. Industry Codes and Standards; Amended Requirements (Part 70)

RIN: 3150-AI53

Docket ID: NRC-2008-0663

Abstract: The direct final rule amends the Commission's regulations governing vessel head inspection requirements. This amendment revises the upper range of the percentage of axial flaws permitted in a specimen set used for the qualification of nondestructive examination systems (procedures, personnel and equipment), which are used in the performance of inservice inspection (ISI) of pressurized water reactor (PWR) upper vessel head penetrations. This amendment is being made as a result of the withdrawal of a stakeholder's recommendation necessitated by a typographical error in the original recommendation with respect to the maximum percentage of flaws that should be oriented axially.

Final Action:	Direct Final Rule Published	08/05/09	74 FR 38890
	Direct Final Rule Effective	10/19/09	
	Proposed Rule Published	08/05/09	74 FR 38997
	Comment Period Closed	09/04/09	
	Confirmation of Effective Date	10/19/09	74 FR 53402

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Manash K. Bagchi, Office of Nuclear Reactor Regulation,
(301) 415-2905 e-mail: Manash.Bagchi@nrc.gov

6. List of Approved Spent Fuel Storage Casks: HI-STORM 100U, Revision 7 (Part 72)

RIN: 3150-AI57

Docket ID: NRC-2009-0080

Abstract: The direct final amends the Commission's regulations by adding the Holtec International HI-STORM 100U model to the "List of Approved Spent Fuel Storage Casks" (10 CFR 72.214). The HI-STORM 100U is an underground, vertical, ventilated, dry storage cask that will be used to store spent nuclear fuel under the revised conditions of the Certificate of Compliance.

Final Action: RIN: 3150-AI57 and RIN: 3150-AI71 are the same rule.

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Neelam Bhalla, Office of Federal and State Materials and
Environmental Management Programs,
(310) 415-6843, e-mail: Neelam.Bhalla@nrc.gov

7. List of Approved Spent Fuel Storage Casks: HI-STORM 100 Revision 6 (Part 72)

RIN: 3150-AI60

Docket ID: NRC-2009-0132

Abstract: This direct final rule amends the Commission's regulations by revising the Holtec International HI-STORM cask design listing to include Amendment No. 6 to the Certificate of Compliance (CoC). This amendment will modify the CoC to add instrument tube tie rods used for pressurized water reactor 15x15 and 17x17 fuel lattices, for both intact and damaged fuel assemblies, to the approved contents of the MPC-24, MPC-24E, MPC-24EF, MPC-32, and MPC-32F models; and to correct legacy editorial issues in Appendices A and B Technical Specifications.

Final Action:	Direct Final Rule Published	06/02/09	74 FR 26285
	Direct Final Rule Effective	08/17/09	
	Proposed Rule Published	06/02/09	74 FR 26310
	Comment Period Closed	07/02/09	
	Confirmation of Effective Date Published	08/11/09	74 FR 40060

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Jayne McCausland, Office of Federal and State Materials and Environmental Management Programs,
(310) 415-6219, e-mail: Jayne.McCausland@nrc.gov

8. List of Approved Spent Fuel Storage Casks: Standardized NUHOMS® System, Revision 10 (Part 72)

RIN: 3150-AI62

Docket ID: NRC-2009-0162

Abstract: The direct final rule amends the Commission's regulations by revising the Transnuclear, Inc., Standardized NUHOMS® System, listing to include Amendment No. 10 to the Certificate of Compliance (CoC). This amendment will modify the CoC to add a dry shielded canister (DSC) designated the NUHOMS®-61BTH DSC; add a dry shielded canister designated the NUHOMS®-32PTH1 DSC; add an alternate high-seismic option of the horizontal storage module for storing the 32PTH1 DSC; allow storage of Westinghouse 15x15 Partial Length Shield Assemblies in the NUHOMS®-24PTH DSC; and allow storage of Control Components in the NUHOMS®-32PT DSC, and add a new Technical Specification, which applies to Independent Spent Fuel Storage Installation sites located in a coastal marine environment, that any load bearing carbon steel component which is part of the HSM must contain at least 0.20 percent copper as an alloy addition.

9. List of Approved Spent Fuel Storage Casks: HI-STORM 100, Revision 7 (Part 72)

RIN: 3150-AI71

Docket ID: NRC-2009-0349

Abstract: The direct final rule amends the Commission's regulations to add Revision 7 to the Holtec International HI-STORM 100 dry cask storage system to add the HI-STORM 100 system to the HI-STORM 100 cask systems in 10 CFR 72.214. This system allows for the underground storage of dry spent nuclear fuel (SNF) by utilizing an underground vertical ventilated module that can accept certain Holtec multipurpose canisters previously certified for storage of SNF in the aboveground HI-STORM system. This amendment also revises the relevant technical specifications (TS) for damaged fuel and fuel debris, and incorporates minor editorial corrections in the TS.

(B) Proposed Rules

B

11. Decommissioning Planning (Parts 20, 30, 40, 50, 70, and 72)

RIN: 3150-AI55

Docket ID: NRC-2008-0030

Abstract: The proposed rule would amend the Commission's regulations to prevent future legacy sites. One set of changes would revise 10 CFR 20.1406 and 20.1501 to require that licensees conduct their operations to minimize contamination at the site, including the subsurface, and to document survey results with records important for decommissioning. A second set of changes would revise regulations in 10 CFR Parts 30, 40, 50, 70, and 72 to provide tighter control of the decommissioning financial assurances and more detailed reporting by licensees of their decommissioning cost estimates. This rule was previously reported under RIN 3150-AH45.

12. Expansion of the National Source Tracking System (Parts 20 and 32)

RIN: 3150-AI29

Docket ID: NRC-2008-0200

Abstract: The proposed rule would amend the Commission's regulations to expand the current National Source Tracking System (NSTS) to include certain additional sealed sources at International Atomic Energy Agency (IAEA) Category 3 threshold values. The proposed amendments would require licensees to report certain transactions involving these sealed sources to the NSTS. These transactions would include the manufacture, transfer, receipt, disassembly, or disposal of the nationally tracked source. The proposed amendment would also require each licensee to provide its initial inventory of nationally tracked sources to the NSTS and annually verify and reconcile the information in the system with the licensee's actual inventory. In a Staff Requirements Memorandum dated June 30, 2009, the Commission was unable to reach a decision

on the staff's recommendation to publish the final rule and, therefore, the recommendation was not approved.

13. Limiting the Quantity of Byproduct Material in a Generally Licensed Device (Part 31)

RIN: 3150-AI33

Docket ID: NRC-2008-0272

Abstract: The proposed rule would amend the Commission's regulations to limit the quantity of byproduct material in generally licensed devices to below one-tenth (1/10) of the International Atomic Energy Agency (IAEA) Code of Conduct's Category 3 threshold. The rule also would modify the compatibility categories contained in the current regulations (10 CFR 31.5 and 31.6) from "B" to "C."

15. Transfers of Certain Source Materials by Specific Licensees (Part 40)

RIN: 3150-AG64

Docket ID: NRC-2002-0013

Abstract: The proposed rule would amend the Commission's regulations to require NRC approval for transfers from licensees of unimportant quantities of source material (less than 0.05 percent by weight) to persons exempt from licensing requirements. The objective of this proposed action is to ensure that the regulations regarding transfers of materials containing low concentrations of source material are adequate to protect public health and safety. Publication of the final rule is being delayed until certain related issues are resolved to minimize the possibility of future inconsistencies in the regulations.

16. Alternate Fracture Toughness Requirements Against Pressurized Thermal Shock Event (Part 50)

RIN: 3150-AI01

Docket ID: NRC-2007-0008

Abstract: The proposed rule would amend the Commission's regulations that protect against brittle fracture of reactor vessels during severe cooldown events. The existing regulations establish screening limits that were developed based on what NRC believed to be a conservative probabilistic fracture mechanics analysis. Several licensees will exceed the screening limits in the current rule during their license renewal periods. The proposed rule would provide alternate fracture toughness requirements which reflect an updated technical basis.

17. Incorporation by Reference of Revisions of Regulatory Guides (Part 50)

RIN: 3150-AI37

Docket ID: NRC-2009-0014

Abstract: The proposed rule would amend the Commission's regulations to incorporate by reference recent revisions of regulatory guides (RG 1.84, Revision 35, and RG 1.147, Revision 16) listing NRC-approved American Society of Mechanical Engineers Boiler and Pressure Vessel Code Cases pertaining to in-service inspection (DG-1134) and design, fabrication, and materials (DG-1133) in nuclear power reactors.

18. Risk-Informed Changes to Loss-of-Coolant Accident Technical Requirements (Parts 50 and 52)

RIN: 3150-AH29

Docket ID: NRC-2004-0006

Abstract: The proposed rule would amend the Commission's regulations to allow for a risk-informed alternative to the present loss-of-coolant accident (LOCA) break size. This rulemaking would address a petition for rulemaking submitted by the Nuclear Energy Institute (NEI) (PRM-50-75). A draft final rule was provided to the Advisory Committee on Reactor Safeguards (ACRS) on October 16, 2006. After reviewing the draft rule, the ACRS informed the Commission of numerous technical and policy concerns and recommended that the rule not be issued. The staff prepared a Commission paper (SECY-07-0082; May 16, 2007) to inform the Commission of the impact of the ACRS recommendations and to request guidance before proceeding with the rule. The Commission provided its guidance in a Staff Requirements Memorandum on August 10, 2007. On April 1, 2008, the staff provided an updated rule schedule to the Commission. In a meeting on August 6, 2008, selected NRC managers approved the staff's recommended resolution of the open issues related to the final rule. The staff prepared draft rule language incorporating the new positions into the rule and adding additional requirements for defense-in depth for pipe breaks larger than the TBS. Several meetings were held to inform NRO of the planned approach. OGC reviewed the revised rule language and recommended that portions of the rule be re-noticed to provide an opportunity for public comments on some of the new rule requirements. In a meeting on October 8, 2008, NRC managers decided to repropose the entire rule. On December 18, 2008, the EDO signed a memorandum informing the Commission that the staff will re-notice the section 50.46a rule for additional public comments in August 2009. The staff first discussed the revised proposed rule with

Proposed Rules**NRC Regulatory Agenda**

the ACRS on May 6-7, 2009 and then published the rule on August 10, 2009 (74 FR 40006). On September 24, 2009, in response to a request from NEI, the NRC extended the public comment period by 120 days to close on January 22, 2010 (74 FR 48667).

20. Update Fuel Performance Considerations and Other Fuel Cycle Issues (Part 51)

RIN: 3150-AA31

Docket ID: NRC-2009-0082

Abstract: The proposed rule would amend the Commission's regulations by addressing uranium fuel cycle environmental data (Table S-3) and the environmental effects of transportation of fuel and waste data (Table S-4). In § 51.51, the environmental data would be re-estimated and reflect changes in the structure and activities of the fuel cycle and the availability of better data. Estimates of releases of Radon-222 and Technetium-99 would be added to Table S-3. The addition of a specific value for Radon-222 would address the outstanding portion of petition for rulemaking PRM-51-1, submitted by the New England Coalition on Nuclear Pollution. To provide immediate relief to the petitioners' request, the Commission published a final rule on March 14, 1977 (42 FR 13803), that removed the original value for Radon-222 from Table S-3 so that it became subject to case-specific litigation. It was anticipated that the Commission would add a specific value for Radon-222, but the Commission deferred action until a general updating of Table S-3 is undertaken. For § 51.52, the environmental impact estimates would be re-estimated to reflect the use of more highly enriched fuel and discharge of more highly irradiated fuels from a reactor; as well as many changes needed to update fuel cycle process and technologies.

This rulemaking would result in current and more accurate estimates of the environmental impact of licensing a new plant, and would eliminate the requirement to review the contribution to environmental impacts from Radon-222 and Technetium-99 in individual plant reviews. This rule would be reissued as a proposed rule, and would update the initial rulemaking effort to address newly emerging issues and research.

25. License and Certificate of Compliance Terms (Part 72)

RIN: 3150-AI09

Docket ID: NRC-2008-0361

Abstract: The proposed rule would amend the Commission's regulations that govern licensing requirements for the independent storage of spent nuclear fuel. These proposed amendments include changes that would enhance the effectiveness and efficiency of the licensing process for spent nuclear fuel storage. Specifically, they would clarify the term limits for dry storage cask Certificates of Compliance (CoCs) and independent spent fuel storage installation (ISFSI) specific licenses. The proposed amendments would also provide consistency between the general and specific ISFSI license requirements, and allow general licensees subject to these regulations to implement changes authorized by an amended CoC to a cask loaded under the initial CoC or an earlier amended CoC.

26. Export and Import of Nuclear Equipment and Materials; Updates and Clarifications (Part 110)

RIN: 3150-A116

Docket ID: NRC-2008-0567

Abstract: The proposed rule would amend the Commission's regulations to update, clarify, and correct several provisions in Part 110 to improve NRC's regulatory framework for the export and import of nuclear equipment, material, and radioactive waste. Among other revisions, the proposed rule would clarify and correct the regulations addressing the general license for the export of byproduct material, revise the definition of "radioactive waste," and modify the regulations governing the export and import of Category 1 and Category 2 quantities of radioactive materials listed in Appendix P to 10 CFR Part 110.

(C) Advance Notices of Proposed Rulemaking

C

27. Entombment Options for Power Reactors (Parts 20 and 50)

RIN: 3150-AG89

Docket ID: NRC-2001-0012

Abstract: The advance notice of proposed rulemaking (ANPR) was published seeking stakeholder input on three proposed regulatory options and whether entombment was a viable decommissioning alternative. In SECY 02-0191 (October 25, 2002), NRC staff proposed deferring the rulemaking until the Office of Nuclear Regulatory Research completed research to develop a sound technical basis for an entombment option. The Office of Nuclear Regulatory Research conducted research in 2004 and 2005, and the work was terminated in FY2005, at the direction of the Commission. A research information letter was prepared summarizing the research results and regulatory implications of using concrete barriers to prevent or control the release of radioactive materials from waste disposal facilities or contaminated sites. The staff is continuing to defer this rulemaking activity.

28. Performance-Based Emergency Core Cooling System Acceptance Criteria (Part 50)

RIN: 3150-AH42

Docket ID: NRC-2008-0332

Abstract: The advanced notice of proposed rulemaking (ANPR) presents a conceptual approach that the Nuclear Regulatory Commission (NRC) is considering in a rulemaking effort to revise the acceptance criteria for emergency core cooling systems (ECCSs) for light-water nuclear power reactors as currently required by NRC regulations that govern domestic licensing of production and utilization facilities. Revised ECCS acceptance criteria would reflect recent research findings that indicate the current criteria should be re-evaluated for all fuel cladding materials in all potential conditions. Further, the NRC is considering an approach that would expand the applicability of the rule to all current and future cladding materials, modify the reporting requirements, and address the issues raised in a petition for rulemaking (PRM) regarding crud and

oxide deposits and hydrogen content in fuel cladding. With this ANPR, the NRC seeks comment on specific questions and issues for consideration related to this proposed conceptual approach to revising the ECCS acceptance criteria.

29. Approach to Risk-Inform, Performance-Based Requirements for Nuclear Power Plants (Parts 50 and 53)

RIN: 3150-AH81

Docket ID: NRC-2006-0008

Abstract: The advanced notice of proposed rulemaking (ANPR) would provide a new set of risk-informed, performance-based requirements for nuclear power plants. The Commission approved the staff's recommendation to defer rulemaking for risk-informed and performance-based part 50 reactor requirements for advanced reactors until after the development of the licensing strategy for the Next Generation Nuclear Plant (NGNP), or receipt of an application for a Pebble Bed Modular Reactor design certification or combined license. The Commission directed the staff to provide a recommendation on initiating rulemaking 6 months after the development of the licensing strategy for the NGNP is finalized. The staff informed the Commission that it will defer rulemaking until after NGNP licensing test review (approximately 2015-2017).

30. Advance Notification to Native American Tribes of Transportation of Certain Types of Nuclear Waste (Parts 71 and 73)

RIN: 3150-AG41

Docket ID: NRC-1999-0005

Abstract: The advance notice of proposed rulemaking (ANPR) invited early input from affected parties and the public on the issues associated with the advance notification of Indian Tribes of spent fuel shipments. NRC's current regulations do not address notification of Indian Tribes. A rulemaking plan was approved by the Commission on February 20, 2001. This rulemaking was put on hold by the Commission pending review of NRC rules in response to events of September 11, 2001. The rulemaking effort has started and is no longer on hold.

31. Research and Test Reactor Fingerprinting Requirements for Unescorted Access (Part 73)

RIN: 3150-AI25

Docket ID: NRC-2008-0619

Abstract: The advanced notice of proposed rulemaking (ANPR) would amend the Commission's regulations to require a finger-print based criminal history records check for individuals with unescorted access to research and test reactors. In SECY-08-0196, dated December 19, 2008, the staff has proposed that the Commission publish an ANPR requesting public comment on several positions of interest pertaining to Research and Test Reactors before initiating rulemaking. The staff conducted a public meeting on April 4, 2009, and has considered the comments from the meeting and those received in response to its ANPR. The staff is in the process of developing a proposed rule to be published in June 2010.

34. Revision to Petition for Rulemaking Process (Part 2)

RIN: 3150-AI30

Docket ID: NRC-2009-0044

Abstract: The proposed rule would amend the Commission's regulations for petitions for rulemaking (PRMs). This rule would clarify requirements and update the NRC's process for the consideration and disposition of PRMs.

Final Action: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Richard Dudley, Office of Nuclear Reactor Regulation,
(301) 415-1116; e-mail: Richard.Dudley@nrc.gov

35. Amendments to Adjudicatory Process Rules and Related Requirements (Parts 2, 51, 54, 60, and 63)

RIN: 3150-AI43

is fully protective of public health and safety, and that the immediate need for this rule has changed due to the shift in timing for reactor decommissioning. The Commission has deferred action on this rulemaking.

Final Action: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Kimyata Morgan Butler, Office of Federal and State Materials and Environmental Management Programs,
(301) 415-0733, e-mail: Kimyata.MorganButler@nrc.gov

38. Material Control and Accounting of Special Nuclear Material (Parts 20, 40, 50, 63, 70, 74, 76, and 110)

RIN: 3150-AI61

Docket ID: NRC-2009-0096

Abstract: The proposed rule would amend the Commission's regulations to revise and consolidate the current Material Control and Accounting (MC&A) program, including regulatory requirements and licensing and inspection practices.

Timetable: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Thomas F. Young, Office of Federal and State Materials and Environmental Management Programs,
(301) 415-5795, e-mail: Thomas.Young@nrc.gov

39. Geological Repository Operations Area (GROA) Fitness-for-Duty Requirements (Part 26)

RIN: 3150-AI38

Docket ID: NRC-2009-0089

Abstract: The proposed rule would amend the Commission's regulations to reinstate the alcohol and drug provisions of the fitness-for-duty requirements to a GROA. The rulemaking would also impose fatigue provisions on security personnel at a GROA.

Final Action: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Merri L. Horn, Office of Federal and State Materials and
Environmental Management Programs,
(301) 415-8126; e-mail: Merri.Horn@nrc.gov

40. Fitness-For-Duty Programs (Part 26)

RIN: 3150-AI58

Docket ID: NRC-2009-0090

Abstract: The proposed rule would amend the Commission's regulations to ensure that personnel who actually perform independent quality control/verification (QC/QV) checks under the licensee's NRC-approved quality assurance program are subject to the same Part 26, Subpart I provisions as operating personnel identified in section 26.4(a)(1).

Final Action: Proposed Rule Published 07/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Lynn M. Hall, Office of Nuclear Reactor Regulation,
(301) 415-3759; e-mail: Lynn.Hall@nrc.gov

41. Fitness-For-Duty (HHS Requirements) (Part 26)

RIN: 3150-AI67

Docket ID: NRC-2009-0225

Abstract: The direct final rule will amend the Commission's regulations to correct technical errors associated with drug testing requirements and enhance the alignment of 10 CFR Part 26 drug testing requirements with those issued by the Department of Health and Human Services (HHS). This rule would enhance consistency with advances in similar rules and guidelines, including, but not limited to HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs. This rulemaking is significant because these inaccuracies, if left uncorrected, would result in an unnecessary regulatory burden on licensees and other entities that operate licensee testing facilities. The urgency of this rulemaking is low; an Enforcement Guidance Memorandum regarding the dispositioning of violations has been issued and few industry concerns have been identified.

The rulemaking has no impact on the public and minimal impact on the industry since the inaccurate provisions are being effectively mitigated by industry actions.

Final Action: Direct Final Rule Published 09/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Paul W. Harris, Office of Nuclear Security and Incident Response,
(301) 415-1169; e-mail: Paul.Harris@nrc.gov

42. Requirements for Distribution of Byproduct Material (Parts 30, 31, 32, 40, and 70)

RIN: 3150-AH91

Docket ID: NRC-2008-0338

Abstract: The proposed rule would amend the Commission's regulations by making the requirements for distributors of byproduct material more explicit, less prescriptive, and more risk-informed, improve safety criteria for approving products through licensing actions, and redefine categories of devices to be used under exemption.

Final Action: Proposed Rule Published 06/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Catherine Mattsen, Office of Federal and State Materials and
Environmental Management Programs,
(301) 415-6264, e-mail: Catherine.Mattsen@nrc.gov

43. Physical Protection of Byproduct Material (Part 30, 32, 33, 34, 35, 37, 39, 51, 71, and 73)

RIN: 3150-AI12

Docket ID: NRC-2008-0120

Abstract: The proposed rule would amend the Commission's regulations to put in place security requirements for the use of category 1 and category 2 quantities of radioactive material. The objective is to ensure that effective security measures are in place to prevent the dispersion of radioactive material for malevolent purposes. The proposed amendment would also address background investigations and access controls, enhanced security for use, and transportation security for category 1 and category 2 quantities of radioactive material. This rulemaking subsumes

RIN-3150-AI56, "Requirements for Fingerprinting and Criminal History Record Checks for Unescorted Access to Radioactive Material and Other Property (Part 37)."

Timetable: Proposed Rule Published: 04/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Merri Horn, Office of Federal and State Materials and Environmental Management Programs,
(301) 415-8126, e-mail: Merri.Horn@nrc.gov

44. Preceptor Attestation Requirements (Part 35)

RIN: 3150-AI63

Docket ID: NRC-2009-0175

Abstract: The proposed rule would amend the Commission's regulations to make amendments requested in the Division of Materials Safety and State Agreements (DMSSA) user need memo, consider training and experience requirements requested in PRM-35-20, and clarify preceptor attestation requirements.

Timetable: Proposed Rule Published: Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Neelam Bhalla, Office of Federal and State Materials and Environmental Management Programs,
(301) 415-6843, e-mail: Neelam.Bhalla@nrc.gov

45. Distribution of Source Material to Exempt Persons and General Licensees and Revision of 10 CFR 40.22 General License (Part 40)

RIN: 3150-AH15

Docket ID: NRC-2009-0084

Abstract: The proposed rule would amend the Commission's regulations to improve the control over the distribution of source material to exempt persons and to general licensees in order to make Part 40 more risk-informed. The proposed rule also would govern the licensing of source material by adding specific requirements for licensing of and reporting by distributors of products and materials used by exempt persons and general licensees. Source material is used under general

license and under various exemptions from licensing requirements in Part 40 for which there is no regulatory mechanism for the Commission to obtain information to fully assess the resultant risks to public health and safety. Although estimates of resultant doses have been made, there is a need for ongoing information on the quantities and types of radioactive material distributed for exempt use and use under general license. Obtaining information on the distribution of source material is particularly difficult because many of the distributors of source material to exempt persons and generally licensed persons are not currently required to hold a license from the Commission. Distributors are often unknown to the Commission. No controls are in place to ensure that products and materials distributed are maintained within the applicable constraints of the exemptions. In addition, the amounts of source material allowed under the general license in 10 CFR 40.22 could result in exposures above 1 mSv/year (100 mrem/year) to workers at facilities that are not required to meet the requirements of Parts 19 and 20. Without knowledge of the identity and location of the general licensees, it would be difficult to enforce restrictions on the general licensees. This rule also would address PRM-40-27 submitted by the State of Colorado and Organization of Agreement States.

Final Action: Proposed Rule Published 04/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Gary C. Comfort, Jr., Office of Federal and State Materials and Environmental Management Programs,
(301) 415-8106, e-mail: Gary.Comfort@nrc.gov

46. Uranium in Drinking Water (Part 40)

RIN: 3150-AH97

Docket ID: NRC-2009-0086

Abstract: The proposed rule would amend the Commission's regulations to include a new general license for a community water system (CWS), that during the treatment of drinking water, may accumulate and concentrate naturally-occurring uranium in media, effluents, and other residuals, above 0.05 percent by weight. This rulemaking is being delayed while NRC evaluates the possibility of removing this type of activity from NRC's jurisdiction. In the meantime, a CWS may choose to operate under the enforcement discretion policy discussed in Regulatory Issue Summary RIS-06-020, "Guidance for Receiving Enforcement Discretion When Concentrating Uranium at Community Water Systems," dated September 14, 2006. Publication of the proposed rule is being delayed while the NRC considers options to remove NRC regulatory jurisdiction from this area.

Final Action: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Gary C. Comfort, Jr., Office of Federal and State Materials and Environmental Management Programs,
(301) 415-8106, e-mail: Gary.Comfort@nrc.gov

47. Groundwater Protection *in Situ* Leach Uranium Recovery Facilities (Part 40)

RIN: 3150-AI40

Docket ID: NRC-2008-0421

Abstract: The proposed rule would amend the Commission's regulations to clarify the regulations in 10 CFR Part 40, Appendix A, "Criteria Relating to the Operation of Uranium Mills and the Disposition of Tailings or Wastes Produced by the Extraction or Concentration of Source Material From Ores Processed Primarily for Their Source Material Content," to better ensure groundwater protection at *in situ* leach uranium recovery facilities. The proposed rule would codify practices currently done through license condition to provide the industry and public with more predictability during the licensing process.

Final Action: Proposed Rule Published 06/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Gary C. Comfort, Jr., Office of Federal and State Materials and Environmental Management Programs,
(301) 415-8106; e-mail: Gary.Comfort@nrc.gov

48. Integrated Safety Analysis for Uranium Conversion and Deconversion Facilities (Part 40)

RIN: 3150-AI50

Docket ID: NRC-2009-0079

Abstract: The proposed rule would amend the Commission's regulations to require an integrated safety analysis (ISA) for facilities with significant quantities of uranium hexafluoride or uranium tetrafluoride and large quantities of hazardous chemicals, such as hydrogen fluoride; set possession limits for determining licensing authority (NRC or agreement States), add definitions that are specific to an ISA; change the maximum licensing term from 10 years to 40 years; and make administrative changes to the structure of Part 40.

Final Action: Proposed Rule Published 04/00/10

In SECY-00-0145, dated June 28, 2000, the NRC staff recommended a decommissioning rulemaking plan in the areas of emergency planning, insurance, safeguards, operator staffing, and backfit (the integrated decommissioning rulemaking plan). The rulemaking plan relied on a draft decommissioning risk study as the basis for its recommendations. The Commission returned the rulemaking plan to the staff for rework in September 2000, based on changes to the decommissioning risk study findings. The decommissioning risk study, NUREG-1738, was issued in January 2001. After assessing the findings in the risk study, the staff presented a policy options paper to the Commission, SECY-01-0100, dated June 4, 2001, that provided options and made recommendations on issues to be addressed in the integrated rulemaking. Following the terrorist events of September 11, 2001, the NRC staff recommended and the Commission approved the withdrawal of SECY-01-0101 because of the likely changes in the staff's position on decommissioning plant safeguards. The decommissioning policy position will be revisited when a broad-scope NRC safeguards policy is developed in response to potential terrorist acts at nuclear facilities. The schedule for the integrated rulemaking cannot be determined at this time.

51. Modifications to Pressure-Temperature Limits and Reactor Vessel Material Surveillance Program Requirements (Part 50)

RIN: 3150-AG98

Docket ID: NRC-2008-0582

Abstract: The proposed rule would amend the Commission's regulations in Part 50, Appendix G to provide a risk-informed option for determining the fracture toughness requirements for ferritic materials of the pressure-retaining components of the reactor coolant pressure boundary. The proposed rule would also modify those requirements for pressure-temperature limits that are related to the metal temperature of the reactor pressure vessel closure head flange and vessel flange areas. Also, the proposed rule would amend footnotes 2 and 6 to table 1 of Appendix G, and simplify restructuring of the table. Part 50, Appendix H, contains reactor vessel material surveillance program requirements to monitor changes in the fracture toughness properties of the reactor vessel beltline due to neutron irradiation.

Final Action: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: Carolyn J. Fairbanks, Office of Nuclear Reactor Regulation,

**52. Decoupling of Assumed Loss of Offsite Power From Loss-of-Coolant Accident (LOCA)
(Part 50)**

RIN: 3150-AH43

Docket ID: NRC-2008-0606

Abstract: The proposed rule would amend the Commission's regulations to remove the requirement to postulate unavailability of offsite power for all loss of coolant accidents, as currently required by General Design Criterion 35. By taking into account risk insights, this requirement would be removed for the larger, less likely events, but would be retained for more frequent (smaller break) losses of coolant. The rulemaking would facilitate certain facility changes, such as emergency diesel generator start times, to optimize them for the more likely events rather than for rare events. In a Staff Requirements Memorandum (SRM) dated March 31, 2003, the Commission directed the staff to prepare a proposed rule. On April 27, 2004, the BWR Owners Group (BWROG) submitted the topical report, "Separation of Loss of Offsite Power from Large Break LOCA" for staff review. The BWROG indicated that the topical report would support plant-specific exemption requests to implement specific plant changes that are currently not possible with the existing rule requirements. The staff recommended in SECY-04-0037, that it be allowed to finish its review of the topical report and pilot exemption request before initiating rulemaking. In its SRM of July 1, 2004, the Commission approved the staff to begin rulemaking after review of the BWROG pilot exemption request. After an ongoing dialogue, on June 12, 2008, the BWROG withdrew its topical report, stating that "...continued development of this LTR [Licensing Topical Report] is no longer cost effective and, if ultimately approved in the form presently desired by NRC staff, adoption by licensees would most likely be prohibitively expensive." Upon this withdrawal, the NRC staff reevaluated the rulemaking effort. As a result of this reevaluation, the NRC staff recommended in SECY-09-0140, dated October 1, 2009, that this rulemaking effort be discontinued. As of December 31, 2009, the Commission has not made a decision. This rulemaking activity also considers the issues raised in a petition for rulemaking submitted by Bob Christie (PRM-50-77).

54. Emergency Response Date System (ERDS) Enhancement (Part 50)

RIN: 3150-AI36

Docket ID: NRC-2009-0088

Abstract: The proposed rule would amend the Commission's regulations to Part 50, Appendix E, Section VI, to modernize ERDs to increase its reliability and ability to provide nuclear plant information to the NRC. The NRC will use this information to assess plant conditions, and licensee response to those conditions, during emergencies involving licensed nuclear facilities.

Effects on Small Business and Other Entities: None

Agency Contact: L. Mark Padovan, Office of Nuclear Reactor Regulation,
(301) 415-1423; e-mail: Mark.Padovan@nrc.gov

55. Incorporation by Reference of Revisions of ASME Regulatory Guides* (Part 50)

RIN: 3150-AI72

Docket ID: NRC-2009-0359

Abstract: The proposed rule would amend the Commission's regulations to incorporate by reference the latest revisions of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code Cases pertaining to RG 1.84, "Design, Fabrication, and Materials Code Case Acceptability, ASME Section III," Revision 36; RG 1.147, "In-service Inspection Code Case Acceptability, ASME Section XI, Division 1," Revision 17, and RG 1.192, "Operation and Maintenance Code Case Acceptability, ASME OM Code," Revision 1. This rulemaking would incorporate by reference the latest revisions of regulatory guides (RGs) approving new and revised Code Cases published by the ASME as alternatives to requirements in the ASME BPV regarding the construction and in-service inspection of nuclear power plant components.

Final Action: Proposed Rule Published 06/00/10

57. Revise Part 71 for IAEA and DOT Compatibility (Part 71)

RIN: 3150-AI11

Docket ID: NRC-2008-0198

Abstract: The proposed rule would amend the Commission's regulations at 10 CFR Part 71 to make the requirements compatible with the 2005 edition of the International Atomic Energy Agency

Transportation Safety Standards, TS-R-1, and changes to the Department of Transportation Hazardous Materials Regulations. This rulemaking would make other changes to 10 CFR Part 71. The proposed rule would amend the quality assurance requirements to make the regulation of quality assurance programs more efficient. In addition, the proposed rule would (1) clarify the general license requirements and (2) make changes to the exemptions relating to the classification of fissile material and low-level materials.

Final Action: Proposed Rule Published 11/00/10

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities: None

Agency Contact: James R. Firth, Office of Federal and State Materials and Environmental Management Programs,

58. List of Approved Spent Fuel Storage Casks: NUHOMS HD System, Revision 1* (Part 72)

RIN: 3150-AI75

Docket ID: NRC-2009-0538

Abstract: This direct final rule amends the Commission's regulations that apply to storage of spent fuel by revising the Transnuclear, Inc. (TN) NUHOMS HD System dry cask storage system listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment No. 1 to Certificate of Compliance (CoC) Number 1030. Amendment No. 1 will modify the CoC to add Combustion Engineering 16x16 class fuel assemblies as authorized contents, reduce the minimum ambient temperature from -20°F to -21 °F, expand the authorized contents of the NUHOMS HD System to include pressurized water reactor fuel assemblies with control components; reduce the minimum initial enrichment of fuel assemblies from 1.5 weight percent uranium-235 to 0.2 weight percent uranium-235; clarify the requirements of reconstituted fuel assemblies, add requirements to qualify metal matrix composite neutron absorbers with integral aluminum cladding, delete use of nitrogen for draining the water from the dry shielded canister (DSC), and allow only helium as a cover gas during DSC cavity water removal operations.

Final Action: Direct Final Rule Published 11/00/10

59. ISFSI Security Requirements for Radiological Sabotage* (Parts 72 and 73)

RIN: 3150-AI78

Docket ID: NRC-2009-0558

Abstract: The proposed rule would amend the Commission's regulations to revise the existing security requirements that apply during the storage of spent nuclear fuel (SNF) at an independent spent fuel storage installation (ISFSI), and during the storage of SNF and High-level waste (HLW) at a Monitored Retrievable storage Installation (MRS). This rule would require conforming changes to the ISFSI and MRS licensing requirements. The specific objectives of this rule are to update the ISFSI security requirements to improve the consistency and clarification of the security requirements for both types of ISFSI licensees (i.e., general and specific); make generically applicable requirements similar to those imposed on ISFSI licensees by the post September 11, 2001, security orders; and use a risk-informed, performance-based structure in ISFSI and MRS security regulations.

62. Access Authorization and Physical Protection Requirements For Nuclear Power Plant Construction (Part 73)

RIN: 3150-AI65

Docket ID: NRC-2009-0195

Abstract: The proposed rule would amend the Commission's regulations to add a new section to Part 73 to Title 10 of the *Code of Federal Regulations*. This new section will contain the security (access controls and physical protection) measures for nuclear power plants under construction that are designed to detect and deter malicious acts during construction that could have a latent or delayed effect and cause a radiological sabotage event during plant operation. The new provisions will address physical protection measures; access authorization controls; physical inspections; monitoring of large preauthorized delivery offloading; lockdown measures, and procedures for securing the security- and safety-related structures, systems, and components.

63. Sabotage of Nuclear Facilities, Fuel or Designated Material (Part 73)

RIN: 3150-AI68

Docket ID: NRC-2009-0227

Abstract: Section 655 of the Energy Policy Act of 2005, requires the NRC to implement requirements for criminal sanctions for sabotage of commercial nuclear facilities, fuel, and Commission designated material or property not previously covered. The staff is developing the proposed rule to implement these requirements. Additional classes of radioactive material or property not specifically mandated in the statute may be included in this rulemaking.

65. Revision of Fee Schedules; Fee Recovery for FY 2010 (Parts 170 and 171)**RIN:** 3150-A170**Docket ID:** NRC-2009-0333

Abstract: The proposed rule amends the Commission's licensing, inspection, and annual fees charged to U.S. Nuclear Regulatory Commission (NRC) licensees and applicants for an NRC license. The rulemaking is necessary to recover, through the assessment of fees, approximately 90 percent of the NRC's budget authority for fiscal year (FY) 2010, less the amounts appropriated from the Nuclear Waste Fund, amounts appropriated for Waste Incidental to Reprocessing, and amounts appropriated for generic homeland security activities, as required by the Omnibus Budget Reconciliation Act of 1990 (OBRA-90), as amended.

Based on the Energy and Water Development and Related Agencies Appropriation Act, 2010, the NRC's required fee recovery amount for the FY 2010 budget is approximately \$912.2 million. After accounting for billing adjustments (i.e., expected unpaid invoices, payments for prior year invoices), the total amount to be billed as fees is \$911.1 million. The OBRA-90, as amended, requires that the fees for FY 2010 be collected by September 30, 2010.

For Rulemaking**

**II
PETITIONS**

A

1. **Petitioner/Petition Docket Number:** State of Colorado and Organization of Agreement States (PRM-40-27)

Docket ID: NRC-2008-0453

Federal Register Citation: July 7, 1999 (64 FR 36615)

Subject: Exemption for source material general licensees

Summary: The petitioner requested that the Commission amend its regulations to restrict the exemption in 10 CFR 40.22(b) for source material general licensees from the radiation protection and worker notification requirements in 10 CFR Parts 19 and 20. Current NRC regulations exempt source material general licensees from the requirements that specify standards of protection against radiation and notification of individuals who participate in licensed activities. The petitioner believes that no basis exists for exempting these licensees from compliance with radiation safety standards if a licensee can exceed currently specified dose limits, create areas where individuals may be exposed to radiation, or dispose of radioactive waste in a manner that is not permitted for other licensees.

Final Action: A notice of resolution and closure of petition docket was published in the Federal Register on September 10, 2009 (74 FR 46512).

2. **Petitioner/Petition Docket Number:** Natural Resources Defense Council (PRM-50-90)

Docket ID: NRC-2008-0279

Federal Register Citation: May 27, 2008 (73 FR 30321)

Subject: Domestic licensing of production and utilization facilities

Summary: The petitioner requested that the NRC amend the regulations that govern domestic licensing of production and utilization facilities, and special nuclear material to establish a date when the NRC will no longer license the use or export of highly enriched uranium (HEU) except for restricted use by a few specialized facilities. The petitioner believes that the amendment is needed to protect the public from potential exposure to an improvised nuclear explosive device made with HEU and used by terrorists.

Final Action: A notice denying this petition was published in the Federal Register on January 28, 2010 (75 FR 4493).

Agency Contact: Robert Beall, Office of Nuclear Reactor Regulation,
(301) 415-3874, e-mail: Robert.Beall@nrc.gov

3. Petitioner/Petition Docket Number: State of Nevada (PRM-73-10)

Docket ID: NRC-2000-0026

Federal Register Citation: September 13, 1999 (64 FR 49410)

Subject: Safeguards for shipments of spent nuclear fuel against sabotage and terrorism

Summary: The petitioner requested that the Commission conduct a comprehensive assessment of the consequences of terrorist attacks that have the capability of radiological sabotage, including attacks against transportation infrastructure used during nuclear waste shipments, attacks involving capture of nuclear waste shipments and use of high-energy explosives against a cask or casks, and direct attacks upon a nuclear waste shipping cask or casks using antitank missiles or other military weapons.

Final Action: A notice of partial denial and closure of petition docket was published in the Federal Register on December 7, 2009 (74 FR 64012).

4. Petitioner/Petition Docket Number: Professional Reactor Operator Society* (PRM 26-3)

Docket ID: NRC-2009-0482

Federal Register Citation: November 27, 2009 (74 FR 62257)

Subject: Fitness for Duty - change to outage definition

Summary: The petitioner is requesting that the NRC amend the regulations that govern fitness for duty programs. Specifically, the petitioner requests that the definition of "unit outage" be changed to "site outage" and be amended to clarify the way licensees schedule manpower on the front and back end of outages. The petitioner believes the suggested amendment would require licensees to abandon past practice that could impact the licensees' ability to safely execute future outages and would help to ensure that nuclear utilities continue to perform outages in a safe and efficient manner.

Final Action: A notice of receipt for this petition was published in the Federal Register on November 27, 2009 (74 FR 62257). The public comment period closes on February 10, 2010. Resolution and closure of this petition is expected in December 2010.

(301) 415-1024, e-mail: Tara.Inverso@nrc.gov

5. Petitioner/Petition Docket Number: Organization of Agreement States (PRM-31-05)

Docket ID: NRC-2005-0018

Federal Register Citation: December 20, 2005 (70 FR 75423)

Subject: Byproduct material; domestic licensing: Industrial devices

Summary: The petitioner is requesting that the NRC amend its regulations to require specific licensing for devices that are currently regulated by a combination of general licensing and registration, and to revise the compatibility category for § 31.6 from "B" to "C."

Final Action: A notice of receipt was published in the Federal Register on December 20, 2005 (70 FR 75423). The public comment closed March 6, 2006. The petition was resolved in July 2007, and is being considered in the rulemaking, General License Restrictions (RIN: 3150-AI33).

Agency Contact: Solomon Sahle, Office of Federal and State Materials and
Environmental Management Programs,

6. Petitioner/Petition Docket Number: James Luehman (PRM-50-92)

Docket ID: NRC-2008-0492

Federal Register Citation: N/A

Subject: Domestic licensing of production and utilization facilities

Summary: The petitioner requested that the Commission amend its regulations regarding the domestic licensing of production and utilization facilities to clarify or change the standards for sustaining a violation of the employee protection regulations contained in § 50.7.

Final Action: A notice of receipt was not published for this petition. This petition is being evaluated. A recommendation on whether to pursue rulemaking is being developed.

7. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-70-8)

Docket ID: NRC-2009-0184

Federal Register Citation: June 6, 2009 (74 FR 26814)

Subject: Event reporting requirements

Summary: The petitioner requested that the Commission amend its regulations to clarify the existing event reporting requirements based on experience gained since the requirements were implemented in 2000.

Final Action: A notice of receipt for this petition was published in the Federal Register on June 6, 2009 (74 FR 26814). The public comment period closed on August 18, 2009. Resolution of the petition is undetermined.

Agency Contact: Candace J. Clemons, Office of Federal and State Materials and
Environmental Management Programs,
(301) 415-5231, e-mail: Clandace.Clemons@nrc.gov

8. Petitioner/Petition Docket Number: C-10 Research and Education Foundation, Inc.
(PRM-72-6)

Docket ID: NRC-2008-0649

Federal Register Citation: March 3, 2009; (74 FR 9178)

Subject: Requirements for the independent storage of spent nuclear fuel, etc.

Summary: The petitioner requested that the Commission amend its regulations that govern licensing requirements for the independent storage of spent nuclear fuel, high-level radioactive waste, and reactor-related greater than class C waste. The petitioner believes that the current regulations do not provide sufficient requirements for safe storage of spent nuclear fuel in dry cask storage or in independent spent fuel storage installations (ISFSIs). The petitioner states that the NRC does not adequately enforce the current regulations that govern dry cask storage by allowing manufacturers, vendors, and licensees to use alternatives to the American Society of Mechanical Engineers (ASME) Code. The petitioner also states that the NRC has not specified license requirements for multiple cask designs under different expiration dates at the same ISFSI, has not adequately considered age-related degradation of dry cask systems, and has no requirements in place to address sabotage and adverse environmental effects on ISFSIs and current and future dry cask storage systems.

Final Action: A notice of receipt for this petition was published in the Federal Register on March 3, 2009 (74 FR 9178). The public comment period closed on May 18, 2009. Resolution of the petition is undetermined.

9. **Petitioner/Petition Docket Number:** Nuclear Energy Institute* (PRM-73-14)

Docket ID: NRC-2009-0493

Federal Register Citation: None

Subject: Request for expedited rulemaking to revise 10 CFR 73.55 compliance date

Summary: In a letter dated September 25, 2009, NEI requested that the NRC undertake an expedited rulemaking to revise the compliance date for specific requirements within 10 CFR 73.55, "Requirements for Physical Protection of Licensed Activities in Nuclear Power Reactors Against Radiological Sabotage." NEI requested that the NRC change the compliance date from March 31, 2010, to December 31, 2010. The staff reviewed the request for rulemaking and determined that the request meets the minimum sufficiency requirements of 10 CFR 2.802, and therefore, could be considered as a petition for rulemaking. Accordingly, the staff docketed the request as PRM-73-14 and notified the petitioner of this decision by letter dated October 1, 2009.

Final Action: Due to the exigent circumstances associated with the request, the staff did not prepare a notice of receipt and request for comment; instead staff gave immediate consideration to the request. Resolution and closure of this petition is expected in early 2010.
