

REPORTING SAFETY CONCERNS TO THE NRC

INTRODUCTION

Anyone should feel free to communicate any safety concern to the U.S. Nuclear Regulatory Commission (NRC). It is the NRC's policy to encourage workers at NRC-regulated facilities to take safety concerns to their own management first, since the facility operator has the primary responsibility for, and is most able to ensure, safe nuclear operations. However, workers and other members of the public can bring safety concerns directly to the NRC at any time. It is the agency's responsibility to respond to those concerns in a timely manner and to protect the identity of the individual to the greatest degree possible.

This brochure discusses how you as a nuclear industry worker or a concerned member of the public can report safety concerns to the NRC, the degree to which the NRC can protect your identity, and the NRC process for handling allegations of discrimination against workers by licensees, their contractors, or subcontractors. For the purpose of this brochure, the term "licensee" refers to an organization/individual, or a contractor, subcontractor, or vendor to an organization/individual, that is an applicant for, or holder of, a license, permit, or certificate issued by the NRC.

Safety concerns may be potential or actual safety issues associated with the NRC's jurisdiction, including, but not limited to, the areas of design, construction, operation, maintenance, radiation protection, safeguards, security, emergency preparedness, harassment, intimidation, retaliation, discrimination, wrongdoing, a work environment that discourages workers from raising safety concerns, and other matters related to NRC-regulated activities.

A WORKER'S ROLE IN NUCLEAR SAFETY

Workers in the nuclear industry have an important role in ensuring safe operations and practices in handling nuclear materials. Protection of public health and safety begins with the NRC's licensing requirements for safe design, construction, and operation of nuclear facilities

and handling of nuclear materials, and continues with inspections to ensure that licensees comply with these requirements and their commitments. However, NRC inspectors can observe only a sampling of the day-to-day activities at nuclear facilities. The NRC considers licensee management to be ultimately responsible for regulatory compliance, and management, in turn, relies on its workers to assist in this effort by identifying and reporting safety concerns. You and your coworkers are the first line of defense for preventing accidents and protecting public health and safety. Your knowledge, operating experience, and insight as nuclear workers give you the ability to identify safety concerns to your employer and the NRC so that problems may be corrected.

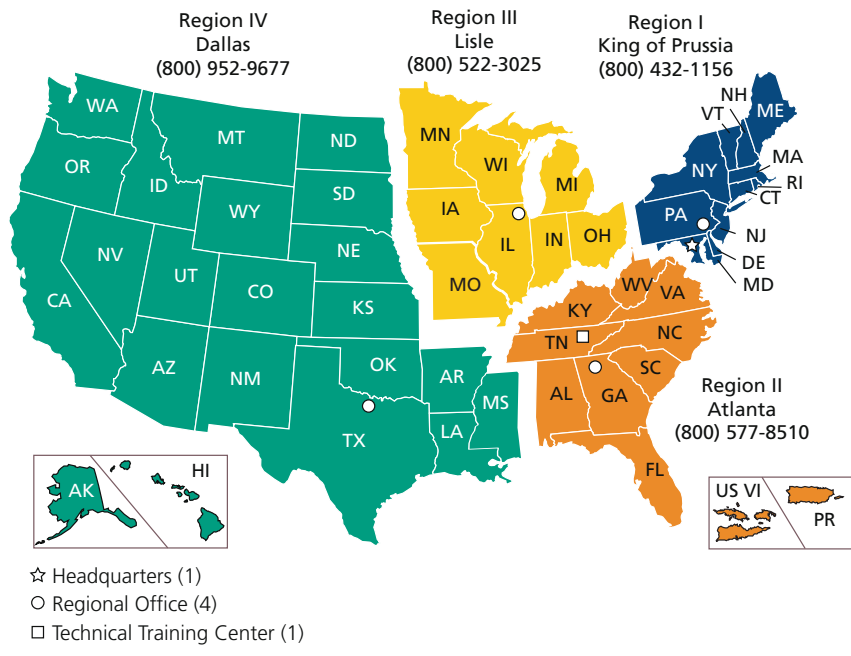

The NRC believes that all workers should feel free to raise concerns to their employers so that issues can be dealt with quickly. At any time, however, employees and members of the public have the option of bringing a safety concern directly to the NRC.

In the past, workers conducting activities associated with NRC-regulated facilities and concerned citizens have raised important safety issues and, as a result, public health and safety have benefitted. This vigilance must continue.

The NRC encourages you to take safety concerns to your employer because your employer—the licensee—has primary responsibility for ensuring the safety of nuclear design, construction, and operations. The licensee is also in the best position to deal with safety issues promptly and effectively. Anyone may raise safety concerns directly to the NRC at any time, but the NRC expects that employees normally will have raised their concerns with their employers before they come to the NRC, if possible.

NRC REGIONS

HOW TO REPORT SAFETY CONCERNS TO THE NRC

You may contact any NRC employee (including a resident inspector), e-mail the NRC at ALLEGATION@nrc.gov, or call the NRC's toll-free Safety Hotline, 1-800-695-7403.

If you call the toll-free number during normal business hours, you will reach the NRC Allegation Coordinator for the NRC regional office serving your State. If you call after normal business hours, your call will be directed to the NRC's Headquarters Operations Center, which is staffed 24 hours a day. In addition, you may reach an NRC Allegation Coordinator at your regional office by calling the appropriate number listed on the figure above during normal business hours.

If you submit your safety concern in writing or via e-mail to the NRC, we recommend you clearly indicate that you would like your concern to be considered by the NRC Allegation Program. This helps to ensure that your letter or e-mail gets prompt attention and is not placed in the public domain. It also helps protect your identity.

To assist you in reporting a safety concern, the NRC typically asks the following questions:

- *Facility name.*
- *What is your concern? What systems, structures, components, or personnel are affected by your concern? Be as factual and detailed as possible.*
- *On what date did the event occur or the issue arise?*
- *Why do you believe this is a potential safety issue?*
- *Recognizing that every issue does not have the same degree of safety significance, do you believe that this concern merits immediate action to resolve it? If yes, why?*
- *Did you observe the event yourself?*
- *If you did not witness the event, how did you find out about it?*
- *Are there other individuals who can provide additional information related to your concern? If so, please identify those individuals so that we can contact them, if needed.*
- *If you do not want to identify the other individuals, have you asked them to contact NRC directly? If not, why?*
- *Are there any records we should review that may be relevant to your concern?*
- *Your name.*
- *Your home address.*
- *Telephone number at which you would prefer the NRC to contact you.*

If you are a worker in the nuclear industry, the NRC staff will typically also ask the following:

- *Have you discussed this with your supervisor or other licensee official? If not, why? If so, what was the response?*
- *If you are not satisfied with the licensee's response, explain why.*
- *Have you discussed this with your Employee Concerns Program representative? If not, why? If so, what was the response?*
- *If you are not satisfied with the Employee Concerns Program's response, explain why.*
- *Why did you decide to bring your concerns to the NRC?*

Although it will help the NRC respond to your concerns if you can answer these questions, you do not need to have answers to all of them in order to raise a safety concern with the NRC.

ALLEGATION PROCESS

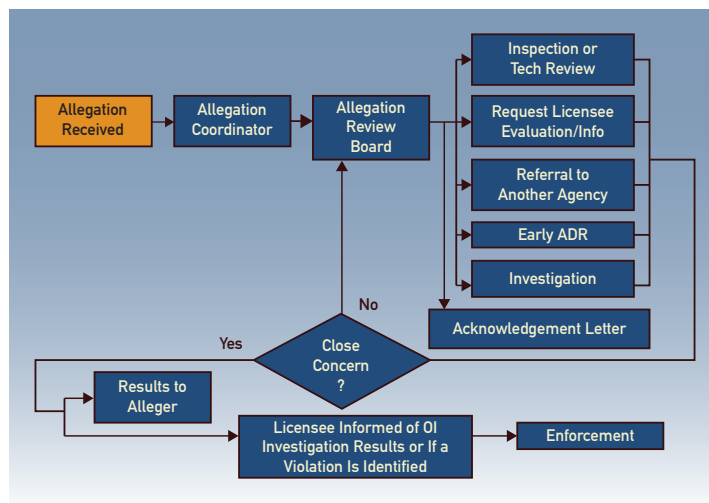

The NRC strives to review all allegations objectively to ensure the outcome is fair, sound, and timely. All allegations brought to the NRC are assigned to an employee designated as an Allegation Coordinator. The coordinator's job is to—

- Promptly contact you to confirm the details of the allegation and to confirm that the NRC has correctly interpreted and understood the information you provided. Normally, the staff sends an acknowledgment letter within 30 days of receipt of your allegation.
- Arrange for an evaluation of your concern by a group of NRC employees and managers designated as an Allegation Review Board (ARB). The ARB will review the concern and make a preliminary determination of its safety significance. The ARB will also determine whether the NRC staff alone will evaluate the allegation, or whether feedback from other agencies or organizations is needed to enable the NRC to complete its assessment of the allegation. The ARB will also determine whether the licensee needs to be contacted. It is the NRC's policy to request from the licensee a written evaluation of concerns in all

cases involving an overriding safety concern, and for other concerns whenever possible and appropriate, after considering certain conditions, including any objections you may have.

- Document NRC actions taken to address the allegation.
- Advise you periodically about the status of the allegation.
- Provide a final report to you upon completion of the allegation evaluation.

The NRC's goal is to complete the review of any technical concerns you may bring forward and send a final report to you in about 6 months. However, it may take longer for the NRC to complete an evaluation of a complicated concern. If it does, you will receive a letter explaining the status of the NRC's review.

CONCERNS OUTSIDE THE NRC'S JURISDICTION

Concerns outside the NRC's jurisdiction are not addressed within the NRC's allegation process and will, as necessary, be forwarded to the appropriate Federal or State agency. You will be notified of the action taken. Examples of these concerns include—

- utility rates
- pay or performance issues not related to raising nuclear safety concerns or other protected activity
- nonradiological industrial or occupational safety
- disposal of nonnuclear waste

IDENTITY PROTECTION

The NRC recognizes that some people will only come forward if they believe their identities will be protected from disclosure. If you are concerned about protecting your identity, NRC representatives will make arrangements to call you at your home or meet with you at a discreet location.

The NRC will make all reasonable efforts not to disclose an individual's identity outside the agency. Only NRC staff who have a need to know will be provided an individual's identity. This would happen, for example, when an inspector or investigator is assigned to interview the individual. Documents that contain the individual's identity are stored in a secured area and are not placed in NRC public document rooms or entered into the NRC's Agencywide Documents Access and Management System (ADAMS).

Even if you do not object to being identified as the source of an allegation, the NRC will not reveal your identity unless it is necessary to evaluate the allegation or otherwise serves the needs of the agency or the public's interest. However, the NRC may be required to reveal your identity outside the agency under the following rare circumstances:

- (1) Disclosure is necessary to protect public health and safety because of an overriding safety issue identified in your allegation.
- (2) Disclosure is necessary to satisfy a request from Congress or from a State or Federal agency.
- (3) Disclosure is required to respond to a court order or Commission order or when necessary in adjudicatory proceedings.
- (4) The NRC needs to pursue a wrongdoing investigation or support a hearing on an NRC enforcement matter.
- (5) You take an action that is inconsistent with protecting your identity, such as notifying the news media or in some way publicly identifying yourself with the allegation.

The NRC will make every effort to withhold your identity in response to Freedom of Information Act requests, unless you have been identified as having brought the concern to the NRC under one of the circumstances outlined above.

Furthermore, if the NRC were to investigate a claim that you were a victim of discrimination because you raised a safety concern, investigating the allegation without identifying you would be extremely difficult. Therefore, when investigating a claim of discrimination, the NRC will disclose your name.

CONFIDENTIALITY AGREEMENTS

If, after the identity protection afforded by the NRC allegation process is explained to you, you remain concerned that your identity may be disclosed, the NRC can provide formal confidentiality. However, the NRC requires you to explicitly request confidentiality, and it is not granted routinely. Confidentiality affords protection of information that directly or otherwise could identify you by name and the fact that you provided the information to the NRC. After an authorized NRC official grants confidentiality, you and the NRC would sign a written agreement. The agreement would explain the conditions under which the NRC will protect your identity. As with the standard identity protection within the allegation process, your identity will be divulged to other NRC employees only on a need-to-know basis.

LIMITATIONS ON CONFIDENTIALITY

Even if confidentiality is granted, the NRC cannot protect your identity under all circumstances. The specific situations requiring identity disclosure are very similar to those described earlier under the standard identity protection within the allegation process. However, disclosures involving overriding safety issues and requests from State or Federal agencies necessitate that the NRC staff seeks your prior approval. If you cannot be reached or do not agree to disclosure, the responsible NRC staff will contact the Commission or resolution.

On rare occasions, the NRC may revoke confidentiality. This may occur if you take an action so inconsistent with the agreement that it overrides the purpose of granting confidentiality, such as discussing the matter with the news media and being publicly identified by the media. Only the Commission itself, the NRC's Executive Director for Operations, or the Director of the Office of Investigations can make a decision to revoke confidentiality.

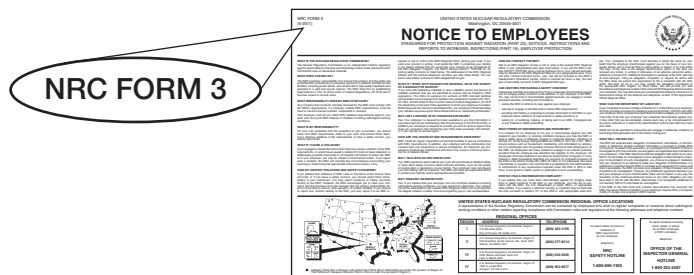

LICENSEE RESPONSIBILITY

The NRC expects licensees to establish and maintain a “safety-conscious work environment” that encourages employees to raise safety concerns to their management, free of any fear of reprisal for doing so. Such a work environment is critical to a licensee’s ability to safely carry out its responsibilities. Licensees must post or otherwise make available to workers a copy of NRC regulations, licenses, and operating procedures that apply to their work. All NRC-issued Notices of Violations involving radiological working conditions and proposed imposition of civil penalties and orders also must be posted.

Further, licensees are required by law to post NRC Form 3, “Notice to Employees,” that describes protected activities and explains how allegations of licensee violations can be reported directly to the NRC. Protected activities include, but are not limited to—

- conferring privately with NRC inspectors about any past or present condition that a worker believes contributed to or caused a violation of NRC regulations
- refusing to engage in activities that violate NRC requirements
- requesting the NRC to enforce its rules against the worker’s employer
- testifying, helping with or taking part in an NRC, congressional, or any Federal or State proceeding
- posting of radiation caution signs and labels
- recording and reporting worker radiation exposure

NRC Form 3 must be posted at prominent locations at the workplace to permit workers to view it easily. A copy of NRC Form 3 is reproduced at the end of this brochure for your reference.

HANDLING DISCRIMINATION AGAINST WORKERS

You should know that *it is illegal for licensees to take discriminatory action—such as firing, reduction of pay, poor performance appraisals, or reassignment to a lower position or job—against a worker for raising safety concerns to management or the NRC.*

You should be aware that while the NRC will investigate some discrimination complaints, the U.S. Department of Labor (DOL) is the agency from which nuclear workers must seek personal remedies when discrimination has occurred for reporting a concern. You may also file a complaint with appropriate State agencies, if applicable. The NRC’s authority is limited to taking an enforcement action against the licensee, such as a fine, an order modifying an NRC license, or, in criminal cases, referral to the U.S. Department of Justice for prosecution.

If the NRC determines that your discrimination concern warrants evaluation under the NRC’s regulations, the NRC Office of Investigations (OI) may investigate your concern. During an investigation, OI gathers testimonial and documentary evidence related to the discrimination concern. Since performing such an investigation without identifying you can be extremely difficult, your name will be disclosed to a limited number of people who work for the employer. If, on the basis of the investigation, the NRC substantiates your discrimination concern, the NRC will consider enforcement action against the employer, as appropriate.

As an alternative to an OI investigation, once the NRC determines that an evaluation of your discrimination claim is warranted, you will be offered an opportunity to participate in the NRC’s preinvestigative alternative dispute resolution (ADR) program, which offers mediation in the handling of discrimination complaints. Mediation is a voluntary process in which two parties, you and your employer/former employer, use an unbiased, neutral individual, or mediator, in an attempt to resolve and settle your discrimination complaint. If an agreement is reached, the NRC will close the discrimination complaint upon settlement and will not perform an investigation. The ADR process applies only to your discrimination complaint—any technical safety issues you raised will be addressed separately.

If ADR does not result in a settlement, the NRC (OI) may initiate an investigation into your discrimination complaint. As mentioned above, the NRC's ADR program is voluntary, and any participant may end the mediation at any time.

The NRC encourages employers to develop similar dispute resolution processes for use in conjunction with their own employee concerns programs. If a worker and employer resolve and settle a discrimination concern using such a process, the employer may voluntarily report the settlement to the NRC. If the NRC is notified of an internal settlement before an NRC OI investigation is initiated, the NRC will close the discrimination complaint and will not perform an investigation.

Workers who raise safety concerns serve a vital role in the protection of public health and safety. Retaliation against those who do so is unlawful and will not be tolerated by the NRC.

Although participation in the NRC's ADR program may lead to negotiation of your discrimination complaint, you should still consider filing a discrimination complaint with the DOL. In order to protect your right to file a discrimination claim with DOL, you must file a written complaint with DOL within 180 days of the date of the alleged discriminatory action or the date you received any notice, in writing or otherwise, of an adverse personnel action, whichever occurs first.

DOL may choose to wait for the ADR mediation to finish in case you reach a settlement with your employer, but timely filing of a discrimination complaint with DOL ensures that DOL will review your claim in the event ADR is unsuccessful.

Once entered, the entire DOL complaint process may take several years to complete. It begins with an attempt by the local DOL office to negotiate a settlement between you and your employer. If this effort is unsuccessful, the local DOL office will investigate to determine whether discrimination occurred and provide its conclusions to the parties involved. Usually, this phase is completed within about 90 days.

At the request of the worker or employer, a DOL administrative law judge can review the conclusions of the local DOL office. The judge will hold a hearing and issue a recommended decision that will be reviewed by the DOL Administrative Review Board. The Administrative Review Board's decision becomes the Secretary of Labor's final decision. The Secretary's decision may be appealed to the U.S. Court of Appeals.

Depending on the outcome in each step of the DOL process, you will have to await decisions concerning reinstatement to your job, payment of back wages, and compensatory damages, including repayment of legal fees. To fully preserve your rights to a personal remedy, you will need to participate in each step of the process.

Written complaints can be sent to the Occupational Safety and Health Administration at any of the DOL regional offices. To obtain the address of the correct regional office, you can either look it up in your local telephone directory or contact an NRC Allegation Coordinator, who can also answer questions about how to file a complaint with DOL.

If you file a discrimination complaint with DOL and later find that you need information from the NRC about issues associated with your protected activity or NRC requirements, you may contact the NRC by calling 1-800-368-5642 and asking for the Agency Allegation Advisor or calling 301-415-8529 directly.

SAFETY-CONSCIOUS WORK ENVIRONMENT

The NRC recognizes that concerns about discrimination can discourage workers from raising safety concerns. Other behaviors, such as defensive or ineffective responses to concerns raised, could also impact the free flow of information at a facility. Therefore, in 1996, the NRC issued a policy statement to convey the Commission's expectation that licensees establish and maintain a safety-conscious work environment in which the following occurs:

- Employees are encouraged and are free to raise safety concerns, both to their management and to the NRC, without fear of retaliation.
- Concerns are promptly reviewed, given the proper priority based on their potential safety significance, and appropriately resolved.

- Timely feedback is provided to the individual raising the concern or others as necessary.

Concerns about the safety-conscious work environment are of interest to the NRC. Some individuals refer to this type of concern as a “chilling effect.” To assist the NRC staff evaluating such a concern, you may be asked the following questions:

- Are there any specific safety concerns you or others have not raised? If so, will you tell us about them now?
- What specifically happened, and when, that impacted your or others’ willingness to raise safety concerns?
- What types of concerns are you hesitant to raise and why? What is their impact on safety?
- To whom are you hesitant to raise concerns and why? What reporting avenues are impacted?
- Which organizations and how many individuals are impacted by the chilling effect?
- Who is contributing to the chilled work environment and what is his or her relationship to those who are chilled?
- Do you believe management is aware of the chilled work environment? If yes, have actions been taken to address the situation and do you feel the actions have been effective?

SUMMARY

The NRC believes that all workers should feel free to raise concerns to their employers so that issues can be dealt with quickly. At any time, however, employees and members of the public have the option of bringing a safety concern directly to the NRC.

Workers who raise safety concerns serve a vital role in the protection of public health and safety. Retaliation against those who do so is unlawful and will not be tolerated by the NRC.

DEFINITIONS

Agency Allegation Advisor—A designated NRC staff member who is responsible for monitoring the NRC’s allegation program and providing advice and guidance to NRC management and staff on handling allegations.

Allegation—A declaration, statement, or assertion of improper or inadequate activity associated with NRC requirements, the validity of which has not been established.

Allegation Review Board (ARB)—A group that consists of a chairman (a senior NRC manager), an Allegation Coordinator, and other individuals within an NRC office or region. The ARB determines the safety significance and actions to be taken to evaluate each allegation.

Allegation Coordinator—A designated staff member who serves as the point of contact for processing allegations in an NRC region or headquarters office.

Allegor—An individual who, or organization that, submits an allegation to the NRC.

Confidentiality—Identity protection for an allegor who has been granted confidential source status.

Investigation—An activity conducted by the NRC’s OI to assist the staff, the NRC’s Office of Enforcement, or the U.S. Department of Justice in resolving wrongdoing allegations.

Protected Activities—Activities that workers engage in when raising potential radiological, safety, and security concerns to their management or to the NRC.

Wrongdoing—Either (1) a willful violation of regulatory requirements through deliberate action or (2) a violation resulting from careless disregard of regulatory requirements, or both.

NOTICE TO EMPLOYEES

STANDARDS FOR PROTECTION AGAINST RADIATION (PART 20); NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS; INSPECTIONS (PART 19); EMPLOYEE PROTECTION

WHAT IS THE NUCLEAR REGULATORY COMMISSION?
The Nuclear Regulatory Commission is an independent Federal regulatory agency responsible for licensing and inspecting nuclear power plants and other commercial uses of radioactive materials.

WHAT DOES THE NRC DO?
The NRC's primary responsibility is to ensure that workers and the public are protected from unnecessary or excessive exposure to radiation and that nuclear facilities, including power plants, are constructed to high quality standards and operated in a safe and secure manner. The NRC does this by establishing and enforcing the Code of Federal Regulations (10 CFR) and in licenses issued to nuclear users.

WHAT RESPONSIBILITY DOES MY EMPLOYER HAVE?
Any company that conducts activities licensed by the NRC must comply with the NRC's requirements. If a company violates NRC requirements, it can be fined or have its license modified, suspended or revoked.
Your employer must tell you which NRC radiation requirements apply to your work, and must post NRC Notices of Violation involving radiological working conditions.

WHAT IS MY RESPONSIBILITY?
For your own protection and the protection of your co-workers, you should know how NRC requirements relate to your work and should follow them. If you observe violations of the requirements or have a safety concern, you should report them.

WHAT IF I CAUSE A VIOLATION?
If you engaged in deliberate misconduct that may cause a violation of the NRC requirements, or would have caused a violation if it had not been detected or reported to your employer, you may be subject to enforcement action. If you report such a violation, the NRC will consider the circumstances surrounding your reporting in determining the appropriate enforcement action, if any.

HOW DO I REPORT VIOLATIONS AND SAFETY CONCERNS?
If you believe that violations of NRC rules or the terms of the license have occurred, or if you have a safety concern, you should report them immediately to your supervisor. You may report violations or safety concerns directly to the NRC. However, the NRC encourages you to raise your concerns with the licensee since the licensee has the primary responsibility for reporting your concern directly to the NRC. You may report to an NRC in-

pector or call or write to the NRC Regional Office serving your area. If you send your concern in writing, it will assist the NRC in protecting your identity if you clearly indicate that you would like your concern to be considered by the NRC Allegation Program. The NRC's toll-free SAFETY HOTLINE for reporting concerns to the NRC is 1-800-695-7403. The NRC's Regional Offices and the toll-free telephone numbers are also listed below. You can also e-mail safety concerns to NRC.Allegation@nrc.gov.

WHAT IF I WORK WITH RADIOACTIVE MATERIAL OR IN THE VICINITY OF A RADIOACTIVE SOURCE?

If you work with radioactive materials or near a radiation source, the amount of radiation exposure that you are permitted to receive may be limited by NRC regulations. The limits on exposure for workers at NRC-licensed facilities are set in 10 CFR Part 20, Subpart D of the Code of Federal Regulations (10 CFR 20.1207-20.1208) and are based on the maximum allowable limits (MAL) of 20 mrem (0.2 mSv) per year for the whole body, and 500 mrem (5 mSv) per year for the hands, feet, and skin. These limits are based on the maximum allowable limits, your employer should also keep your radiation exposure as far below these limits as is "reasonably achievable."

MAY I GET A RECORD OF MY RADIATION EXPOSURE?
Yes. Your employer is required to make available to you the information in your dose records (as maintained under the provisions of 10 CFR 20.2016). In addition, your employer is required to provide you with an annual report of your radiation exposure for each monitoring year if the dose exceeds 100 millirem, or if you request an annual report.

HOW ARE VIOLATIONS OF NRC REQUIREMENTS IDENTIFIED?
NRC conducts regular inspections at licensed facilities to assure compliance with NRC requirements. In addition, your employer and site contractors may conduct their own inspections to assure compliance. All inspectors are protected by Federal law. Interference with them may result in criminal prosecution for a Federal offense.

MAY I TALK WITH AN NRC INSPECTOR?
Yes. NRC inspectors want to talk to you if you are worried about radiation safety or have other safety concerns about licensed activities, such as the quality of construction or operations at your facility. Your employer may not prevent you from talking with an inspector. The NRC will make all reasonable efforts to protect your identity where appropriate and possible.

MAY I REQUEST AN INSPECTION?
Yes. If you believe that your employer has not corrected violations involving radiological working conditions, you request an inspection. Your request should be made in writing to the NRC. Once the NRC receives your request, the alleged violation in detail. It must be signed by you or your representative.

HOW DO I CONTACT THE NRC?
Talk to an NRC inspector on-site or call or write to the nearest NRC Regional Office in your geographical area (see page below). If you call the NRC's toll-free SAFETY HOTLINE during normal business hours, your call will automatically be directed to the NRC Regional Office for your geographical area. If you call after normal business hours, your call will be directed to the NRC's Headquarters Operations Center, which is monitored 24 hours a day. You can also e-mail safety concerns to NRC.Allegation@nrc.gov.

CAN I BE FIRED FOR RAISING A SAFETY CONCERN?

Federal law prohibits an employer from firing or otherwise discriminating against you for bringing safety concerns to the attention of your employer or the NRC. You may not be fired or discriminated against because you engage in certain protected activities, including but not limited to:

- asking the NRC to enforce its rules against your employer;
- refusing to engage in activities which violate NRC requirements;
- providing information or preparing to provide information to the NRC or your employer about violations of requirements or safety concerns; or
- asking for, testifying, helping, or taking part in an NRC, Congressional, or any Federal or State proceeding.

WHAT FORMS OF DISCRIMINATION ARE PROHIBITED?

It is unlawful for an employer to fire you or discriminate against you with respect to pay, benefits, working conditions because you help the NRC or Section 211 of the Energy Reorganization Act (ERA) of 1974 (42 U.S.C. 5851) include actions such as harassment, blacklisting, and intimidation by employees (i) employees who bring safety concerns directly to their employers or to the NRC; (ii) employees who have refused to engage in an unlawful practice; (iii) employees who have testified before Congress or in any Federal or State proceeding; or (iv) employees who have testified before Congress or in any Federal or State proceeding. The ERA or AEA or who have, or are about to, testify, assist, or participate in such a proceeding.

HOW DO I FILE A DISCRIMINATION COMPLAINT?
If you believe that you have been discriminated against for bringing violations or safety concerns to the NRC or your employer, you may file a complaint with the NRC. You must file a complaint with the NRC within 90 days of the date you were discriminated against. If you desire a personal remedy, a complaint must be filed with the DOL pursuant to Section 211 of the ERA or the AEA or with appropriate state en-

ties. Your complaint to the DOL must describe in detail the basis for your belief that the employer discriminated against you on the basis of your protected activity, and it must be filed in writing either in person or by mail within 180 days of the date of the alleged discriminatory action or the date you discovered the action. Additional information is available at the DOL website at www.osha.gov. Filing an allegation, complaint, or request for action with the DOL does not extend the requirement to file a complaint with the NRC within 180 days. To do so, you may contact the Allegation Coordinator in the appropriate NRC Region, as listed below, who will provide you with the address and telephone number of the NRC OSHA Regional Office. Please contact the Government Listings for the address and telephone number of the appropriate OSHA Regional Office.

WHAT CAN THE DEPARTMENT OF LABOR DO?
If your complaint involves a violation of Section 211 of the ERA by your employer, the DOL provides a process for obtaining a personal remedy. The DOL will notify your employer that a complaint has been filed and will investigate your complaint. If the DOL finds that your employer has unlawfully discriminated against you, it may order that you be reinstated, receive back pay, or be compensated for any injury suffered as a result of the discrimination and be paid attorney's fees and costs.

Relief will not be awarded to employees who engage in deliberate violations of the Energy Reorganization Act or the Atomic Energy Act.

WHAT WILL THE NRC DO?

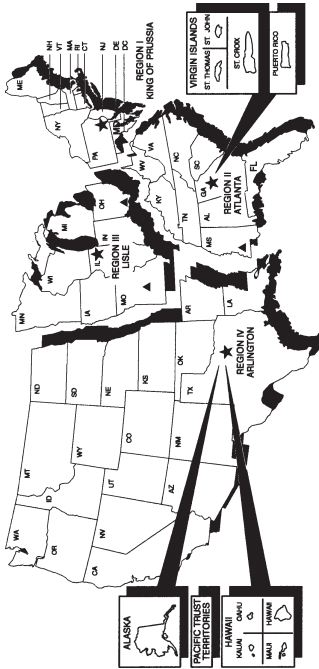

The NRC will evaluate each allegation of harassment, intimidation, or discrimination. To assist in this evaluation, an investigator from the NRC's Office of Investigations (OI) may interview you and gather any applicable documentary information. If the NRC determines that the allegation falls within its purview, the NRC's OI will initiate an investigation of your allegation of discrimination unless, prior to the initiation of such investigation, you choose to engage in mediation with your employer in an attempt to settle your allegation of discrimination. If you do not wish to engage in mediation, the NRC will proceed with an investigation and will find it acceptable. However, any settlement agreement between you and your employer on your discrimination claim will not impact, in any way, the resolution of the underlying technical issues or any other allegation you may have filed or will file with the NRC. Alternatively, if an acceptable settlement is not reached, the NRC's OI will initiate an investigation.

If the NRC or the DOL finds that unlawful discrimination has occurred, the NRC may issue a Notice of Violation to your employer, impose a fine, or suspend, modify, or revoke your employer's NRC license.

UNITED STATES NUCLEAR REGULATORY COMMISSION REGIONAL OFFICE LOCATIONS
A representative of the Nuclear Regulatory Commission can be contacted by employees who wish to register complaints or concerns about radiological working conditions or other matters regarding compliance with Commission rules and regulations at the following addresses and telephone numbers.

REGIONAL OFFICES

REGION	ADDRESS	TELEPHONE
I	U.S. Nuclear Regulatory Commission, Region I 2100 Renaissance Boulevard, Suite 100 King of Prussia, PA 19406-2713	(800) 432-1156
II	U.S. Nuclear Regulatory Commission, Region II 245 Peachtree Center Avenue NE, Suite 1200 Atlanta, GA 30303-1257	(800) 577-8510
III	U.S. Nuclear Regulatory Commission, Region III 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4952	(800) 522-3025
IV	U.S. Nuclear Regulatory Commission Region, IV 1600 East Lamar Boulevard Arlington, Texas 76011-4511	(800) 952-9677

▲ Callaway Plant, Site in Missouri and Grand Gulf Plant, Site in Mississippi are under the purview of Region IV. The Portsmouth Gaseous Diffusion Plant in Ohio is under the purview of Region II.
