Area Walk-By Checklist (AWC)

Location (Bldg, Elev, Room/Area): Area 25 - AB1, 633, 123

Instructions for Completing Checklist

This checklist may be used to document the results of the Area Walk-By near one or more SWEL items. The space below each of the following questions may be used to record the results of judgments and findings. Additional space is provided at the end of this checklist for documenting other comments.

1. Does anchorage of equipment in the area appear to be free of potentially adverse seismic conditions (if visible without necessarily opening cabinets)? Yes
Spalling concrete by right corner of 1-RPST-B panel embed plate

 2. Does anchorage of equipment in the area appear to be free of significant degraded conditions? Yes

 3. Based on a visual inspection from the floor, do the cable/conduit raceways and HVAC ducting appear to be free of potentially adverse seismic conditions (e.g., condition of supports is adequate and fill conditions of cable trays appear to be inside acceptable limits)? Yes

 4. Does it appear that the area is free of potentially adverse seismic spatial interactions with other equipment in the area (e.g., ceiling tiles and lighting)? No
Check ceiling tiles - OK, clipped per DWG 12-4070. Procedure cart by panel 1-CRCD can tip into panel - AR 2012-11726 was issued. Block wall by 1-DR-AUX413 - OK per DWG 12-4029, Wall W-12. Fire extinguisher by fire rolling door & next to Door 1-DR-AUX413 has long seismic hook but is not set right. Can easily slip off. Fire extinguisher by panel door (seismic hook but not positioned correctly). - AR 2012-11730 was issued to address bent hooks, and fire extinguisher positioning. Fire extinguisher 633A 25 CO2 mounted to panel 1-ANN-LC6 on seismic hook but can interact with panel - will also be addressed in AR 2012-11730.

 5. Does it appear that the area is free of potentially adverse seismic interactions that could cause flooding or spray in the area? Yes

 6. Does it appear that the area is free of potentially adverse seismic interactions that could cause a fire in the area? Yes

 7. Does it appear that the area is free of potentially adverse seismic interactions associated with housekeeping practices, storage of portable equipment, and temporary installations (e.g., scaffolding, lead shielding)? Yes
-

1. Does anchorage of equipment in the area appear to be free of potentially adverse seismic conditions (if visible without necessarily opening cabinets)? Yes
Batteries & big vent above only equipment in area except eye wash and shoer stations, lights, 1 valve and thermometer

 2. Does anchorage of equipment in the area appear to be free of significant degraded conditions? Yes

 3. Based on a visual inspection from the floor, do the cable/conduit raceways and HVAC ducting appear to be free of potentially adverse seismic conditions (e.g., condition of supports is adequate and fill conditions of cable trays appear to be inside acceptable limits)? Yes

 4. Does it appear that the area is free of potentially adverse seismic spatial interactions with other equipment in the area (e.g., ceiling tiles and lighting)? Yes
Check vent anchorage - Vent 1-HV-SGRX-5 SQUG document - refers to SQUG-1-HV-SGRX-2 (Anchorage OKAY)

 5. Does it appear that the area is free of potentially adverse seismic interactions that could cause flooding or spray in the area? Yes

 6. Does it appear that the area is free of potentially adverse seismic interactions that could cause a fire in the area? Yes

 7. Does it appear that the area is free of potentially adverse seismic interactions associated with housekeeping practices, storage of portable equipment, and temporary installations (e.g., scaffolding, lead shielding)? Yes
-

Status: Y N U

Area Walk-By Checklist (AWC)

Location (Bldg, Elev, Room/Area): Area 35 - AB1, 609, 200

8. Have you looked for and found no other seismic conditions that could adversely affect the safety functions of the equipment in the area? Yes

Instructions for Completing Checklist

This checklist may be used to document the results of the Area Walk-By near one or more SWEL items. The space below each of the following questions may be used to record the results of judgments and findings. Additional space is provided at the end of this checklist for documenting other comments.

1. Does anchorage of equipment in the area appear to be free of potentially adverse seismic conditions (if visible without necessarily opening cabinets)? Yes
Check that crane 12-QM-23 is parked properly (away from SFP pit)

 2. Does anchorage of equipment in the area appear to be free of significant degraded conditions? Yes
Panel 12-SFP-12 - Verified As-Is anchorage configuration with SQUG 12-SFP-12 data sheet - AR 2012-12381 issued to update drawing 12-5636.

 3. Based on a visual inspection from the floor, do the cable/conduit raceways and HVAC ducting appear to be free of potentially adverse seismic conditions (e.g., condition of supports is adequate and fill conditions of cable trays appear to be inside acceptable limits)? Yes

 4. Does it appear that the area is free of potentially adverse seismic spatial interactions with other equipment in the area (e.g., ceiling tiles and lighting)? No
Fire extinguishers on short hooks - AR 2012-11669 was issued. Wall around SFP pit - Block wall - OK per DWG 12-4027, Wall W-14.

 5. Does it appear that the area is free of potentially adverse seismic interactions that could cause flooding or spray in the area? Yes

 6. Does it appear that the area is free of potentially adverse seismic interactions that could cause a fire in the area? Yes

 7. Does it appear that the area is free of potentially adverse seismic interactions associated with housekeeping practices, storage of portable equipment, and temporary installations (e.g., scaffolding, lead shielding)? Yes
