On March 12, 2012, the U. S. Nuclear Regulatory Commission (NRC) issued the order identified above as Reference 1 to Union Electric Company (dba Ameren Missouri) for Callaway Plant. Reference 1 was immediately effective and directs Ameren Missouri to develop, implement, and maintain guidance and strategies to maintain or restore core cooling, containment, and spent fuel pool cooling capabilities in the event of a beyond-design-basis external event. Specific requirements are outlined in Attachment 2 of Reference 1.

Section IV, Condition C.1.a of Reference 1 requires submission of an Overall Integrated Plan by February 28, 2013. The NRC Interim Staff Guidance (ISG) (Reference 2) was issued August 29, 2012 which endorses industry guidance document NEI 12-06, Revision 0 (Reference 3) with clarifications and exceptions identified in Reference 2. Reference 3 provides direction regarding the content of the Overall Integrated Plan.

Reference 4 provided Ameren Missouri's initial status report for Callaway Plant regarding mitigation strategies, as required by Reference 1.

The purpose of this letter is to provide the Overall Integrated Plan pursuant to Section IV, Condition C.1.a of Reference 1. This letter confirms Ameren Missouri has received Reference 2 and has an Overall Integrated Plan developed in accordance with the guidance for defining and deploying strategies that will enhance the ability to cope with conditions resulting from beyond-design-basis external events.

The enclosure to this letter provides Ameren Missouri's Overall Integrated Plan for mitigation strategies at Callaway Plant pursuant to Reference 3. The enclosed integrated plan is based on conceptual design information. Final design details and associated changes for implementation such as procedure guidance, as well as any revisions to the information contained in the Enclosure to this letter, will be provided in the 6-month Overall Integrated Plan updates required by Reference 1.

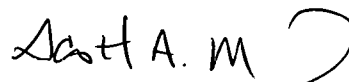

This letter does not contain new commitments.
