**NRC REGULATORY ISSUE SUMMARY 2014-04
NATIONAL SOURCE TRACKING SYSTEM
LONG-TERM STORAGE INDICATOR**

ADDRESSEES

All licensees possessing Category 1 or Category 2 quantities of sealed sources reportable to the National Source Tracking System (NSTS).

All Agreement State Radiation Control Program Directors.

All holders of an operating license or construction permit for a nuclear power reactor under Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, "Domestic Licensing of Production and Utilization Facilities," except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel.

All holders of an operating license for a non-power reactor (research reactor, test reactor, or critical assembly) under Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, "Domestic Licensing of Production and Utilization Facilities," except for those who have permanently ceased operations.

INTENT

The U.S. Nuclear Regulatory Commission (NRC) is issuing this Regulatory Issue Summary (RIS) to encourage licensees on a voluntary basis, to submit additional information pertaining to sources identified in Long Term Storage in the NSTS to include the "use status" of their sealed sources (i.e., whether or not their sources are in use or have become disused). No specific action or any written response is required. The NRC is providing this RIS to the Agreement States for their information and for distribution to their licensees as appropriate.

BACKGROUND

Every year, thousands of sources become disused and unwanted in the United States. While secure storage is a temporary measure, the longer sources remain disused or unwanted, the chances increase that they will become unsecured or abandoned.

ML14100A152

These sources have been the focus of much interagency attention from a national security standpoint since the publication of the [2006 Radiation Source Protection and Security Task Force Report](#). However, in many cases, disposal pathways are not currently available for disused sealed sources (and there are restricted options for storage of no-disposal-pathway waste).

The [2010 Radiation Source Protection and Security Task Force Report](#) recommended that the NRC request additional information from licensees about their sealed sources in storage. Sharing sealed source use-status information will encourage more efficient sealed source management, as well as the timely disposal of disused and unwanted sealed sources, some of which now have a commercial disposal pathway.

SUMMARY OF ISSUE

Licensees have been reporting Category 1 and Category 2 radioactive source transactions to the NSTS since January 2009 in accordance to 10 CFR 20.2207 requirements. Types of reportable transactions include the manufacture, transfer, receipt, disassembly, and disposal of Category 1 and Category 2 sources. Additionally, the regulation requires licensees to annually verify their inventory of nationally tracked sources possessed against the inventory in the NSTS.

However, licensees are not required to report to Federal or State regulators the “use status” of their sealed sources (i.e., whether or not their sources are in use or have become disused).

Sharing the use-status of sealed sources would benefit both licensees and regulators. For licensees, such a practice will encourage increased awareness of, and attention to, effective disused sealed source management, which may include financial and logistical planning for disposal, including related transportation costs and challenges. For sealed sources without a commercial disposal pathway, planning may involve coordination with source recyclers (including manufacturers), or Federal programs which facilitate the recovery and disposition of disused sources. This type of attention and planning will not only facilitate timelier sealed source disposition, but also increase licensee awareness of the national security and public health and safety concerns related to keeping disused and unwanted sealed sources in storage for longer than necessary.

For regulators, use-status information will increase their awareness of how many sealed sources under their purview are disused and in storage, where they are located, and what types of disposal challenges their licensees may encounter. For both regulators and licensees, this type of information sharing will improve the quality and efficiency of sealed source management and disposition, which, in turn, will benefit national security, public health, and safety.

Licensees who would like to provide this status information can specify the sources are in “Long-Term Storage” in NSTS, or they can indicate the status in their NSTS transaction reports.

Licensees using the NSTS online can indicate long-term storage of sources as follows:

1. On the NSTS Main Menu, click “Specify Long-Term Storage Sources.”
2. Enter the “Make,” “Model,” and “Serial Number” to locate the source, or click “Search” to see all sources in the inventory.
3. Click the “Select” radio button to select the source and click “Specify Long-Term Storage.”

4. Enter a date in the “Long-Term Storage” date field and enter text in the “Long-Term Storage Reason” field.
5. Comment field is optional.
6. Click “Save.”

Licensees reporting source transaction information using NRC Form 748 can provide the long-term storage information in the “Comment” field on the transaction report. Sample text is provided below:

“This source is in long-term storage as of mm/dd/yyyy because it is no longer in use and a current disposal path is not available.”

Additional information on reporting to the NSTS is available on the NSTS Web site (<http://www.nrc.gov/security/byproduct/ismp/nsts.html>). Licensees with questions on how to use the NSTS or who wish to have online access to the NSTS can contact the NSTS Help Desk:

Hours:	Monday – Friday: 8:00 am to 8:00 pm (ET)
Phone:	1-877-671-6787
Email:	NSTSHelp@nrc.gov

BACKFIT DISCUSSION

This RIS requires no action or written response and the backfit rule (10 CFR 50.109, 70.76, 72.62, or 76.76) does not apply. Consequently, the NRC staff did not perform a backfit rule analysis.

FEDERAL REGISTER NOTIFICATION

A notice of opportunity for public comment on this RIS was not published in the *Federal Register* because it is informational and does not represent a departure from current regulatory requirements.

CONGRESSIONAL REVIEW ACT

This RIS is not a rule as defined in the Congressional Review Act (5 U.S.C. §§ 801-808).

PAPERWORK REDUCTION ACT STATEMENT

This RIS contains information collection requirements that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). These information collection requirements were approved by the Office of Management and Budget, approval number 3150-0202.

PUBLIC PROTECTION NOTIFICATION

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information collection or an information collection requirement unless the requesting document displays a currently valid OMB control number.

CONTACT

This RIS requires neither specific action nor written response. If you have any questions about this summary, please contact the technical contact listed below or the appropriate regional office.
