SUBJECT: Entergy's Supplemental Response to NRC Request for Information Pursuant to 10 CFR 50.54(f) Regarding the Flooding Aspects of Recommendations 2.3 of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident
Indian Point Unit Numbers 2 and 3
Docket Nos. 50-247 and 50-286
License Nos. DPR-26 and 64

REFERENCE: Entergy Letter to NRC, NL-13-156, Entergy's Required Response for NTTF Recommendation 2.1: Flooding - Hazard Reevaluation Report, December 23, 2013.

Dear Sir or Madam:

On March 12, 2012, the NRC requested information to support the evaluation of the NRC staff recommendations for the Near-Term Task Force (NTTF) review of the accident at the Fukushima Dai-ichi nuclear facility. Recommendation 2.1 of the NRC request was for a reevaluation of all appropriate external flooding sources and the submittal of a Hazard Evaluation Report. The Entergy response was submitted in the Reference letter as "Entergy Fleet Fukushima Program Flood Hazard Reevaluation Report for Indian Point Energy Center (IPEC) Units 2 and 3" Revision 0.

The subsequent NRC audit on May 27 to 30 was conducted using "Entergy Fleet Fukushima Program Flood Hazard Reevaluation Report for Indian Point Energy Center (IPEC) Units 2 and 3" Revision 2. The purpose of this letter is to supplement revision 0 of the report contained in the Referenced letter by docketing a copy of revision 2 of the report which is enclosed.
