

## Enclosure 2

### Prioritized Fiscal Year 2017 Rulemaking Activities

The staff used Commission developed criteria to perform the common prioritization and re-baselining of all planned Fiscal Year (FY) 2017 activities. As directed in Staff Requirement Memoranda (SRM)-15-0015, staff aligned the planned work with the Nuclear Regulatory Commission's (NRC's) mission, Principles of Good Regulation, and Values.

This enclosure summarizes the results of common prioritization and re-baselining for rulemaking activities. These activities were taken from the budget "Product" for rulemaking and for the Fukushima Near Term Task Force work. Activities to incorporate by reference certified designs into 10 CFR Part 52 were treated as Licensing, and are not included in this list.

Activities, including rulemaking, with minimal levels of resources (generally less than one Full Time Equivalent staff person) were not included in common prioritization or re-baselining unless they were tied to a specific efficiency improvement. Inclusion of work activities with such nominal resources would not have been efficient.

The common prioritization list below was developed in November 2015. Information available at that time, which was more current than during initial budget planning, led to the modification of priorities and plans. Additionally, information developed since November led to two additional rules (not listed below) being included in the final proposed FY 2017 budget.

For the reasons cited above, as well as the use of somewhat different evaluation criteria, this list does not align directly with other lists of rulemaking and rulemaking support activities, including the Rulemaking Activity Plan.

Prioritized List of FY 2017 Funded Rulemaking Activities as of November 2015	
1	Annual Fee Rule (required by statute)
2	Mitigation of Beyond Design Basis Events
3	10 CFR 50.46(c) Performance-Based Emergency Core Cooling System Performance During Loss-of-Coolant Accidents
4	Enhanced Weapons Rulemaking for Reactor sites (required by statute)
5	Enhanced Weapons Rulemaking for Spent Fuel Storage sites (required by statute)
6	Spent Fuel Storage and Transportation Certificates of Compliance Rulemaking (multiple Rules per year)
7	Financial Qualifications
8	Digital Instrumentation and Control Common Mode Failure Rulemaking
9	Update of Codes and Standards, 10 CFR 50.55(a) Rulemaking (6 Rules)
10	Revision to 10 CFR Part 40, Appendix A for Groundwater Protection for In Situ Leach Uranium Recovery Facilities
11	Revision to 10 CFR Part 26, Fitness for Duty, to address current Health and Human Services Guidelines (2 Rules)
12	Decommissioning Transition
13	Revision and follow-on to 10 CFR Part 37, Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material

14	Revision to 10 CFR Part 50, Appendix H, Reactor Vessel Material Surveillance Program, and Non-power Reactor License Renewal, two separate but related Rules.
15	Revision to 10 CFR Part 73, Cyber Security for Fuel Facilities
16	Revision to 10 CFR Part 73 Enhanced Security for Special Nuclear Material
17	Revision to 10 CFR Part 75 Modified Small Quantities Protocol
18	Required Technical Corrections and corporate rulemaking (3 Rules)
19	Revision to 10 CFR Part 71 Compatibility with International and Department of Transportation standards
20	Cyber Security for Byproduct Material
21	Items Containing Byproduct Material Incidental to Production (Polymer Track Etched Membranes)
List of FY 2017 Funded Rulemaking Activities Recommended for Delay	
1	Dodd-Frank Act of 2010 (Governing the use of Bond Ratings)
2	Update Security Requirements for Independent Spent Fuel Storage Installations
List of FY 2017 Funded Rulemaking Activities Recommended for Shedding	
1	Revision to 10 CFR Part 20 to Address International Recommendations
2	Revision to 10 CFR 50.46(a) to Add a Voluntary Risk-Informed Loss-of-Coolant Accident Analysis Option
3	Revision to 10 CFR Part 21 Reporting Requirements
4	Revision to 10 CFR Part 50, Appendix I to Address International Recommendations
