## New NRC Resident Inspector Assigned to Seabrook Nuclear Power Plant

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Travis Daun as the new resident inspector at Seabrook Station, in Seabrook, N.H. He joins NRC Senior Resident Inspector Paul Cataldo at the site, operated by NextEra Energy Seabrook, LLC.

Daun joined the NRC in 2012 as a reactor engineer in the NRC's Region III Office in Lisle, Ill. Most recently, he was a resident inspector at the Susquehanna plant in Berwick, Pa. Daun had previously served for 11 years in the Navy's nuclear power program. He has a bachelor's degree in electrical engineering from Marquette University, a master's degree in cyber security from Syracuse University and a master's in business management from American Intercontinental University.

Each U.S. commercial nuclear plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting inspections, monitoring major work projects and interacting with plant workers and the public. Resident Inspectors can be assigned to any one site for up to seven years.
