NRC to Hold Virtual Regulatory Performance Meeting to Discuss Supplemental Inspection Results for Grand Gulf Nuclear Power Plant

Nuclear Regulatory Commission staff will discuss the results of a recent onsite supplemental inspection of the Grand Gulf nuclear power plant during a [virtual meeting](#) to be held Oct. 4.

The session will run from 5-7 p.m., Central time. Following [registration](#), a confirmation email will be sent with details on how to join the video webinar. To listen to the audio presentation, participants must call 888-323-9703 and enter passcode 1786567#. The meeting will be recorded and later made available on the NRC website.

NRC staff responsible for plant inspection and oversight will participate in the discussion, including the Region IV Regional Administrator and the supplemental inspection team leader. NRC staff will discuss the results of a comprehensive inspection conducted between Aug. 23 and Sept. 17 in response to the station's degraded performance in 2020. Officials from Entergy Operations, Inc., which operates the plant, will discuss their performance improvement plan. Members of the public will have an opportunity to ask questions of NRC staff following the business portion of the meeting.

Grand Gulf, located in Port Gibson, Mississippi, continues to operate safely. Because of the number of unplanned plant shutdowns in 2020, the plant is receiving increased oversight and inspection focus.

The annual assessment [letter](#) for Grand Gulf is available on the NRC website. Current performance information for the plant is also [available](#) and is updated on a quarterly basis.
