NRC Names New Resident Inspector at Arkansas Nuclear One

The Nuclear Regulatory Commission has selected Timothy DeBey as its resident inspector at Arkansas Nuclear One located in Russellville, Ark.

DeBey joined the agency's Region IV office in Arlington, Texas, in 2017. He has served as acting resident inspector at Cooper Nuclear Station and the River Bend nuclear plant. Prior to joining the agency, he was in the Naval Nuclear Power Program and served in licensed positions at several research reactor facilities under NRC or Department of Energy oversight.

He holds bachelor's and master's degrees in nuclear engineering from Kansas State University.

Each U.S. commercial nuclear power plant has at least two resident inspectors. DeBey joins Senior Resident Inspector Chris Henderson and Resident Inspector Tom Sullivan at Arkansas Nuclear One. They serve as the agency's eyes and ears at the facility, conduct regular inspections, monitor plant operations and significant work projects, and interact with plant workers and the public.
